Perth Waldorf School & Parkerville Steiner College submission to the Productivity Commission's Draft Report - *Future Foundations for Giving*.

Introduction

The Productivity Commission's draft report into Philanthropy – Future Foundations for Giving – has provided a range of recommendations in relation to philanthropic giving in Australia and Perth Waldorf School & Parkerville Steiner College welcomes the opportunity to provide feedback.

This submission will focus on the recommendation to remove DGR status for school building funds on the basis that there is “the potential for a donor to be able to convert a tax-deductible donation into a private benefit.”

We are extremely concerned that the Productivity Commission in its interim report has recommended the removal of Deductible Gift Recipient (DGR) status for School Building Funds, and we believe that this action would have a significant negative impact on our community and thousands of others around Australia and urge the Commission to reconsider.

Perth Waldorf School & Parkerville Steiner College is located in Bibra Lake and Parkerville and currently enrolls 650 students and employs 160 teachers and other staff and play integral roles in shaping the social and economic fabric of Fremantle, Mundaring Shire, and their surroundings. Steiner schools, in our belief, serve as cultural institutions uniquely positioned to meet the needs of the world at this juncture.

Schools as not -for profit entities

Like the majority of non-government schools in Australia, [name of school] is a not-for-profit entity, registered with the Australian Charities and Not-for-Profits Commission (ACNC) with the charitable purpose of ‘advancing education’. This recognition of the importance and public benefit of the work of schools in educating Australia’s young people underpins the DGR status of the school building fund at our school and others around Australia.

The importance of building funds for schools

Across Australia, Independent school families, alumni and communities collectively contribute 86 per cent of school capital income nationally. Two-thirds of Independent schools receive no government funding for capital expenditure. In many schools, capital funding is 100 per cent sourced from parents and school communities.

In 2021, the value of this contribution from Independent school families, alumni and communities was around \$1.14 billion for school building and capital works. These same families contribute around \$5.7 billion annually to the ongoing costs of educating their children, with their after-tax dollars.

Examples of the pivotal use of our School Building Fund include the construction of new science classrooms, a pre-primary facility, and the construction of six classrooms at Parkerville Steiner College, our new campus in the Hills. In 2023, parents and community donations to capital works at Perth Waldorf School surpassed \$140,000, significantly contributing to essential school infrastructure.

Private Benefit

The Productivity Commission has argued in its report that in the case of school building funds, there is “the potential for a donor to be able to convert a tax-deductible donation into a private benefit is especially apparent for primary and secondary education, particularly where students are charged fees.”

However, the Productivity Commission has shown no real evidence to support its argument that there is a material risk of tax-deductible donations to school building funds being converted into a private benefit.

School Building Funds support capital works programs and develop assets with a life that extends far beyond the 12 years a child spends at school. Further, it is not only the families of current students that contribute to school building funds, but alumni, community groups, and others through a range of fundraising activities. It is extremely unlikely that a member of the community, or a school alumnus – who may have left the school many years ago – could benefit directly from these donations.

And while the draft report raised the possibility of there being a link between donations and fees charged for education services, this is not the case in schools. Capital works are funded separately to the recurrent operating costs that are recouped through fees, and deductible donations to a School Building Fund therefore do not materially reduce the fees payable by parents.

Impact of the removal of DGR status for school building funds

Removing DGR status for non-government school building funds will shift more financial burden onto families, who already make significant sacrifices to support their children’s education and are doing their best to manage the ever-increasing cost of living pressures.

For Perth Waldorf School & Parkerville Steiner College, the removal of DGR status for school building funds will directly impact the capacity of the school to provide the best possible learning environment

for our students. This will include future building projects such as new classrooms as our Parkerville Steiner College campus grows each year.

Conclusion

Perth Waldorf School & Parkerville Steiner College does not support the Productivity Commission's recommendation to withdraw DGR status from school building funds and is concerned about the very detrimental impact it could have on the provision of quality education nationally.

On behalf of our students, families and the wider school community we ask that the Commission reconsider this recommendation.

Thank you for your consideration of this submission.

Yours sincerely

Bruce Lee
