

## **St Martins Lutheran College submission to the Productivity Commission's Draft Report - *Future Foundations for Giving***

### **Introduction**

The Productivity Commission's draft report into Philanthropy – *Future Foundations for Giving* – has provided a range of recommendations in relation to philanthropic giving in Australia and St Martins Lutheran College welcomes the opportunity to provide feedback.

This submission will focus on the recommendation to remove DGR status for school building funds on the basis that there is “the potential for a donor to be able to convert a tax-deductible donation into a private benefit.”

We are extremely concerned that the Productivity Commission in its interim report has recommended the removal of Deductible Gift Recipient (DGR) status for School Building Funds and we believe that this action would have a significant negative impact on our community and thousands of others around Australia, and urge the Commission to reconsider.

St Martins Lutheran College is located in Mount Gambier and currently enrolls 800 students and employs 160 teachers and other staff. The school contributes to the social and economic life of the community in which it is situated.

### **Schools as not for profit entities**

Like the majority of non-government schools in Australia, St Martins Lutheran College is a not-for-profit entity, registered with the Australian Charities and Not-for-Profits Commission (ACNC) with the charitable purpose of ‘advancing education’. This recognition of the importance and public benefit of the work of schools in educating Australia's young people underpins the DGR status of the school building fund at our school and others around Australia.

### **The importance of building funds for schools**

Across Australia, Independent school families, alumni and communities collectively contribute 86 per cent of school capital income nationally. Two-thirds of Independent schools receive no government funding for capital expenditure. In many schools, 100 per cent of capital funding is sourced from parents and school communities.

In 2021, the value of this contribution from Australian Independent school families, alumni and communities was around \$1.14 billion for school building and capital works. These same families contribute around \$5.7 billion annually to the ongoing costs of educating their children, with their after-tax dollars.

In 2023 the value of parents and community donations to capital works at St Martins Lutheran College was \$135,650 and went towards the development of much-needed school infrastructure. For example, this funding was used to refurbish our Junior School toilet block and replace the floor in our Gym, which has resulted in improved hygiene facilities and child safety for our Junior School students and a gym floor that is safe and appropriate for the many activities our gym is used for including local community use.

Any building work at St Martins Lutheran College is for the use of future, as well as current, students and is also often utilised by the broader community.

### **Private Benefit**

The Productivity Commission has argued in its report that in the case of school building funds, there is “the potential for a donor to be able to convert a tax-deductible donation into a private benefit is especially apparent for primary and secondary education, particularly where students are charged fees.”

However, the Productivity Commission has shown no real evidence to support its argument that there is a material risk of tax-deductible donations to school building funds being converted into a private benefit.

School Building Funds support capital works programs and develop assets with a life that extends far beyond the 13 years a child spends at school. Further, it is not only the families of current students that contribute to school building funds, but alumni, community groups, and others through a range of fundraising activities. It is extremely unlikely that a member of the community, or a school alumnus – who may have left the school many years ago – could benefit directly from these donations.

And while the draft report raised the possibility of there being a link between donations and fees charged for education services, this is not the case in schools. Capital works are funded separately to the recurrent operating costs that are recouped through fees, and deductible donations to a School Building Fund therefore do not materially reduce the fees payable by parents.

### **Impact of the removal of DGR status for school building funds**

Removing DGR status for non-government school building funds will shift more financial burden onto families, who already make significant sacrifices to support their children’s education and are doing their best to manage the ever-increasing cost of living pressures.

For St Martins Lutheran College, the removal of DGR status for school building funds will directly impact the capacity of the school to provide the best possible learning environment for our students. This will include future building projects such as our Senior School Hub.

### **Conclusion**

St Martins Lutheran College does not support the Productivity Commission’s recommendation to withdraw DGR status from school building funds and is concerned about the very detrimental impact it could have on the provision of quality education nationally.

On behalf of our students, families and the wider school community we ask that the Commission reconsider this recommendation.

Thank you for your consideration of this submission.
