Dear Michelle,

Submission to public hearings for the 'draft' Review of Legislation Regulating the Architectural Profession by the Productivity Commission, Perth, 6 June 2000

Problems with the Methodology of the Review

- Unexplained and apparently doubtful expertise to undertake the report.
- Inadequate consultation: in Western Australia the Commission visited only three bodies and only visited for one day.

Problems with Understanding the Role of Architects

- Review misunderstands the role of Architects.
- Review misunderstands the benefits that the registration Architects provides to community as a whole.

Problems with the Outcomes

- Due to the poor methodology and lack of understanding of the role of Architects the Outcomes are flawed,

Yours faithfully
