

PRODUCTIVITY COMMISSION DRAFT REPORT ON STANDARD SETTING AND LABORATORY ACCREDITATION

BCA REFERENCED STANDARDS

Upon a recount of the Australian Standards I now count approximately 106 referenced standards in the BCA.

In previous submissions 20/4/2006 and 14/8/2006 it was mentioned there were 149 referenced standards however after a latest count there are approximately 106. Nevertheless this is still many standards for those in the building industry to purchase.

This also affects the amount of increase in referenced standards over the last few years to approximately a 7% increase.

Apologies.
