

3A Headline indicators — attachment

The tables in this file accompany the Report, *Overcoming Indigenous Disadvantage: Key Indicators 2007*, prepared by the Steering Committee for the Review of Government Service Provision. Background and definitions are available in the Report, which is available on the Review website (www.pc.gov.au/gsp).

This file is available in both Microsoft Excel and Adobe PDF formats on the Review website (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (details inside the front cover of the Report).

Contents

3A.1 Life expectancy at birth

- Table 3A.1.1** Estimated life expectancies at birth (years)
- Table 3A.1.2** Median age at death, NSW, Queensland, WA, SA, NT, 2000–2005
- Table 3A.1.3** Causes of death by Indigenous status, Qld, WA, SA and the NT, 2001–2005

3A.2 Disability and chronic disease

- Table 3A.2.1** Age standardised rates of people with selected long term conditions, by type of condition and Indigenous status, Australia, 2001 and 2004-05
- Table 3A.2.2** Rates of people with selected long term conditions, by age and Indigenous status, Australia, 2004-05
- Table 3A.2.3** Age standardised rates of people with selected long term conditions, by type and number of conditions, gender and Indigenous status, Australia, 2004-05
- Table 3A.2.4** Age standardised rates of people with selected long term conditions, by type of condition, State/Territory and Indigenous status, 2004-05
- Table 3A.2.5** Rates of people with selected long term conditions, by type of condition, remoteness and Indigenous status, Australia, 2001 and 2004-05
- Table 3A.2.6** Age standardised rates of people with diabetes/high sugar levels who find the condition interferes with their usual daily activities, by type of activity and Indigenous status, Australia, 2004-05
- Table 3A.2.7** Rates of Indigenous people aged 18 years and over with selected long term conditions, by type of personal stressor experienced by self, family or friends, Australia, 2004-05
- Table 3A.2.8** Male Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2001-02
- Table 3A.2.9** Male Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2002-03
- Table 3A.2.10** Male Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2003-04
- Table 3A.2.11** Male Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2004-05
- Table 3A.2.12** Female Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2001-02
- Table 3A.2.13** Female Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2002-03
- Table 3A.2.14** Female Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2003-04
- Table 3A.2.15** Female Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2004-05

3A.3 Years 10 and 12 retention and attainment

- Table 3A.3.1** Apparent retention rates of full time students (per cent)
- Table 3A.3.2** School participation rates by Indigenous status of students, all schools, 2006 (per cent)
- Table 3A.3.3** Apparent retention rates of full time Indigenous and non-Indigenous students, all schools, 2006 (per cent)
- Table 3A.3.4** Apparent retention rates of full time Indigenous and non-Indigenous students, all schools, 2005 (per cent)
- Table 3A.3.5** Apparent retention rates of full time Indigenous and non-Indigenous students, all schools, 2004 (per cent)

Contents

Table 3A.3.6	Apparent retention rates of full time Indigenous and non-Indigenous students, all schools, 2003 (per cent)
Table 3A.3.7	Apparent retention rates of full time Indigenous and non-Indigenous students, all schools, 2002 (per cent)
Table 3A.3.8	Apparent retention rates of full time secondary students from year 10 to year 12, 2006 (per cent)
Table 3A.3.9	Apparent retention rates of full time secondary students from year 10 to year 12, 2005 (per cent)
Table 3A.3.10	Apparent retention rates of full time secondary students from year 10 to year 12, 2004 (per cent)
Table 3A.3.11	Students achieving a year 12 certificate in 2005 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems
Table 3A.3.12	Students achieving a year 12 certificate in 2004 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems
Table 3A.3.13	Students achieving a year 12 certificate in 2003 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems
Table 3A.3.14	Students achieving a year 12 certificate in 2002 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems
Table 3A.3.15	Students achieving a year 12 certificate in 2001 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems
Table 3A.3.16	Highest level of schooling completed by persons aged 15 years and over and not currently studying at secondary school, 2004-05
Table 3A.3.17	Highest level of schooling completed by persons aged 15 years and over and not currently studying at secondary school by remoteness areas, 2004-05
Table 3A.3.18	Highest level of schooling completed by persons aged 15 years and over and not currently studying at secondary school by age, 2004-05
Table 3A.3.19	Educational attainment by selected characteristics (Indigenous persons aged 15 years and over), 2004-05
Table 3A.3.20	Educational attainment by selected characteristics (Indigenous persons aged 15 years and over), age standardised, 2004-05
Table 3A.3.21	Educational attainment by selected characteristics (non-Indigenous persons aged 15 years and over), age standardised, 2004-05

3A.4 Post secondary education — retention and attainment

Table 3A.4.1	Participation in post secondary education by persons aged 18 years and over
Table 3A.4.2	Participation in post secondary education by Indigenous persons aged 18 years and over
Table 3A.4.3	Participation in post secondary education by persons aged 18 years and over, 2004-05
Table 3A.4.4	Participation in post secondary education by persons aged 18 years and over by remoteness, 2004-05
Table 3A.4.5	Participation in post secondary education by persons aged 18 years and over by age, 2004-05
Table 3A.4.6	Participation in higher education, 2005 (per cent of all domestic students)
Table 3A.4.7	Participation in higher education, 2004 (per cent of all domestic students)
Table 3A.4.8	Participation in higher education, 2003 (per cent of all domestic students)

Contents

Table 3A.4.9	Participation in higher education, 2002 (per cent of all domestic students)
Table 3A.4.10	Post secondary attainment by persons aged 18 years and over
Table 3A.4.11	Post secondary attainment by Indigenous persons aged 18 years and over
Table 3A.4.12	Post secondary attainment by persons aged 18 years and over, 2004-05
Table 3A.4.13	Post secondary attainment by persons aged 18 years and over, 2004-05
Table 3A.4.14	Post secondary attainment by persons aged 18 years and over by remoteness, 2004-05
Table 3A.4.15	Post secondary attainment by persons aged 18 years and over by age, 2004-05
Table 3A.4.16	Vocational education and training load pass rate
Table 3A.4.17	Vocational education and training load pass rate
Table 3A.4.18	Vocational education and training load pass rate by course level
Table 3A.4.19	Success rate for higher education, 2004
Table 3A.4.20	Success rate for higher education, 2003
Table 3A.4.21	Success rate for higher education, 2002
Table 3A.4.22	Success rate for higher education, 2001

3A.5 Labour force participation and unemployment

Table 3A.5.1	Age standardised labour force participation and unemployment, people aged 15 to 64 years, by sex, age and State and Territory, 2004-05
Table 3A.5.2	Age standardised labour force participation and unemployment, people aged 15 to 64 years, by sex and remoteness, 2004-05
Table 3A.5.3	Labour force participation and unemployment, people aged 18 to 64 years
Table 3A.5.4	Community Development Employment Project (CDEP) participation, Indigenous people aged 15 to 64 years, by remoteness, 2004-05
Table 3A.5.5	Community Development Employment Project (CDEP) participation, Indigenous people aged 15 to 64 years, by State and Territory, age and sex, 2004-05
Table 3A.5.6	Long term unemployment, people aged 15 to 64 years, by age and sex, 2004-05
Table 3A.5.7	Labour force participation and unemployment, Indigenous people aged 15 to 64 years, by sex and remoteness, 2004-05
Table 3A.5.8	Long term unemployment, Indigenous people aged 18 to 64 years, by sex and remoteness
Table 3A.5.9	Community Development Employment Project (CDEP) participation and labour force status, Indigenous people aged 18 to 64 years

3A.6 Household and individual income

Table 3A.6.1	Median equivalised gross weekly household cash income, people aged 18 years and over
Table 3A.6.2	Median and mean equivalised gross weekly household income, Indigenous people aged 18 years or over (2004-05 dollars)
Table 3A.6.3	Equivalised gross weekly household income quintiles, people aged 18 years or over, by State and Territory, 2004-05
Table 3A.6.4	Equivalised gross weekly household income quintiles, people aged 18 years or over, by remoteness, 2004-05
Table 3A.6.5	Median of personal gross weekly income, people 18 years or over, 2004-05

Contents

Table 3A.6.6	Personal gross weekly income quintiles, people aged 18 years and over, by remoteness, 2004-05
Table 3A.6.7	Personal gross weekly income quintiles, people aged 18 years and over, by State and Territory, 2004-05
Table 3A.6.8	Main sources of personal gross weekly income, people aged 18 years or over, 2004-05

3A.7 Home ownership

Table 3A.7.1	Indigenous people aged 18 years or over living in homes someone in their household owned or was purchasing, or was renting, by State and Territory, 2004-05
Table 3A.7.2	People aged 18 years or over living in homes someone in their household owned or was purchasing, by State and Territory, 1994 and 2002
Table 3A.7.3	Indigenous people aged 18 years or over living in homes someone in their household owned or was purchasing, or was renting, by remoteness area, 2004-05.
Table 3A.7.4	Indigenous people aged 18 years or over living in homes someone in their household owned or was purchasing, by remoteness area, 2002
Table 3A.7.5	Housing tenure of people aged 18 years or over, by Indigenous status, 2004-05.
Table 3A.7.6	Housing tenure of people aged 18 years or over, by Indigenous status, 1994 and 2002
Table 3A.7.7	Indigenous people aged 15 years or over living in homes someone in their household owned or was purchasing, or was renting, by State and Territory, 2002 and 2004-05
Table 3A.7.8	Indigenous people aged 15 years or over living in homes someone in their household owned or was purchasing, or was renting, by remoteness area, 2002 and 2004-05
Table 3A.7.9	Housing tenure of people aged 15 years or over, by Indigenous status, 2002 and 2004-05

3A.8 Suicide and self-harm

Table 3A.8.1	Intentional self-harm death rates (per 100 000 population), age standardised, 2001–2005
Table 3A.8.2	Suicide deaths, by age and jurisdiction, 2001–2005
Table 3A.8.3	Intentional self-harm deaths, by sex and jurisdiction 2001–2005
Table 3A.8.4	Intentional self-harm (X60–X84) deaths, 2001–2005
Table 3A.8.5	Standardised non-fatal hospitalisations for intentional self-harm by sex and Indigenous status, Qld, SA, WA, and public hospitals in the NT

3A.9 Substantiated child abuse and neglect

Table 3A.9.1	Children aged 0–16 years in substantiations
Table 3A.9.2	Children (aged 0–16 years) who were the subject of a substantiation: type of abuse or neglect 2005–06
Table 3A.9.3	Children (aged 0–16 years) who were the subject of a substantiation: type of abuse or neglect 2004–05
Table 3A.9.4	Children (aged 0–16 years) who were the subject of a substantiation: type of abuse or neglect 2003–04

Contents

Contents

Table 3A.9.5	Children (aged 0–16 years) who were the subject of a substantiation: type of abuse or neglect 2002-03
Table 3A.9.6	Children (aged 0–16 years) who were the subject of a substantiation: type of abuse or neglect 2001-02

3A.10 Deaths from homicide and hospitalisations for assault

Table 3A.10.1	Homicide death rate (per 100 000 population), age standardised, 2001–2005
Table 3A.10.2	Homicide deaths, by age and State/Territory, 2001–2005
Table 3A.10.3	Homicide deaths, by sex and State/Territory, 2001–2005
Table 3A.10.4	Indigenous and non-Indigenous homicide victims, by State/Territory, 2004-05
Table 3A.10.5	Indigenous and non-Indigenous homicide victims, by remoteness area
Table 3A.10.6	Distribution of homicides according to the Indigenous status of victims and offenders, 2004-05
Table 3A.10.7	Selected comparative statistics on Indigenous and non-Indigenous homicides, 2004-2005
Table 3A.10.8	Key factors associated with Indigenous and non-Indigenous homicides, 1999-2000 to 2004-05
Table 3A.10.9	Non-fatal hospitalisations for assault, age standardised, by sex and Indigenous status, Qld, WA, SA and public hospitals in the NT, 2001-02
Table 3A.10.10	Non-fatal hospitalisations for assault, age standardised, by sex and Indigenous status, Qld, WA, SA, and public hospitals in the NT, 2002-03
Table 3A.10.11	Non-fatal hospitalisations for assault, age standardised, by sex and Indigenous status, Qld, WA, SA, and public hospitals in the NT, 2003-04
Table 3A.10.12	Non-fatal hospitalisations for assault, age standardised, by sex and Indigenous status, Qld, WA, SA, and public hospitals in the NT, 2004-05

3A.11 Family and community violence

Table 3A.11.1	SAAP support periods: main reason clients sought support, Australia, by Indigenous status, 2005-06
Table 3A.11.2	SAAP support periods: main reason female clients sought support, Australia, by Indigenous status, 2005-06
Table 3A.11.3	SAAP support periods: main reason clients with children sought support, Australia, by Indigenous status, 2005-06
Table 3A.11.4	SAAP support periods: main reason clients sought support (broad groups), by Indigenous status, 2005-06
Table 3A.11.5	Victims recorded by NSW Police: selected offence types by Indigenous status, 2005
Table 3A.11.6	Victims recorded by NSW Police: selected offence types by Indigenous status, 2004
Table 3A.11.7	Victims recorded by NSW Police: selected offence types by Indigenous status, 2003
Table 3A.11.8	Victims recorded by NSW Police: selected offence types by Indigenous status, 2002
Table 3A.11.9	Female victims recorded by NSW Police: selected offence types by Indigenous status, 2005
Table 3A.11.10	Female victims recorded by NSW Police: selected offence types by Indigenous status, 2004
Table 3A.11.11	Female victims recorded by NSW Police: selected offence types by Indigenous status, 2003

Contents

Table 3A.11.12	Female victims recorded by NSW Police: selected offence types by Indigenous status, 2002

2004	82.8	82.5	82.3	83.3	71.3
2005	83.1	82.6	83.2	83.7	70.5

(a) Median age at death does not adjust for the age structure of the populations involved.

(b) Based on deaths registered to 31 December 2005.

(c) Data for 2005 is incomplete due to delays between occurrence and registration of deaths.

(d) Victoria, Tasmania and the ACT are excluded due to poor coverage rates or small numbers.

(e) Care should be exercised when comparing median age at death of Indigenous and non-Indigenous people because of differential rates of Indigenous identification by age and different age structures in the two populations.

Source: ABS 2006, *Deaths Australia 2005*, Cat. no. 3302.0, Canberra.

Table 3A.1.3 Causes of death by Indigenous status, Qld, WA, SA and the NT, 2001–2005 (a)

	Indigenous %	Non-Indigenous %	Age standardised rate per 100 000	Indigenous Age standardised rate per 100 000	Non-Indigenous Age standardised rate per 100 000	Ratio
Underlying cause of death						
Circulatory diseases	26.6	36.8	783.9	228.9	39.3	3.4
Accidents, poisonings and violence	16.2	6.3	123.5	39.3	3.1

Kidney diseases	2.0	1.5	64.0	9.6	6.7	
Other causes	9.1	5.3	143.7	37.1	3.9	
All causes	100.0	100.0	2043.7	621.7	3.3	
Number of deaths	7 544		227 393			

(a) Calculations of rates for the Indigenous population are based on ABS Experimental Projections, Aboriginal and Torres Strait Islander Australians (low series, 2001 base). There are no comparable population data for the non-Indigenous population. Calculations of rates for the non-Indigenous population are based on data derived by subtracting Indigenous population projections from total population estimates and should be used with care.

Table 3A.2.4

Table 3A.2.4 Age standardised rates of people with selected long term conditions, by type of condition, State/Territory and Indigenous status, 2004-05 (a)

	<i>Indigenous</i>		<i>Non-Indigenous</i>	
	<i>Rate (%)</i>	<i>RSE (%)</i>	<i>Rate (%)</i>	<i>RSE (%)</i>
(a) Selected long term conditions are based on ICD classifications. Estimates for long term conditions with an RSE of 25 per cent to 50 per cent should be interpreted with caution. Estimates for long term conditions with an RSE greater than 50 per cent are considered too unreliable for general use.				
(b) Statistical testing indicates that this data item is not suitable for age standardisation.				
(c) Since 2000, the sample in the NT for some social surveys (including the 2004-05 National Health Survey) has been reduced to a level such that records contribute appropriately to national estimates but will not support reliable estimates for the NT. This reallocation of resources has enabled a larger NT sample to be used in the General Social Survey and the Indigenous Social Survey conducted periodically by the ABS. As a result, estimates for the NT are not shown separately in these tables.				
(d) Difference between 2004-05 Indigenous and non-Indigenous data is not statistically significant.				

na Not available. **RSE** Relative standard error.

- (a) Selected long term conditions are based on ICD classifications. Estimates for long term conditions with an RSE of 25 per cent to 50 per cent should be interpreted with caution. Estimates for long term conditions with an RSE greater than 50 per cent are considered too unreliable for general use.
- (b) Remoteness areas are derived from the Australian Standard Geographical Classification (ASGC) developed by the ABS. The ASGC Remoteness classification identifies a region in Australia as having a particular degree of remoteness. Remoteness areas comprise five categories, including major cities, inner regional, outer regional, remote, and very remote. In the table above, 'non-remote' includes major cities, inner regional and outer regional categories whereas 'remote' includes the remote and very remote categories of the ASGC. The degree of remoteness of each Collection District (CD) is determined using the Accessibility/Remoteness Index of Australia (ARIA). ABS generates an average ARIA score for each CD. The CDs are then aggregated by class to form the remoteness areas in each State and Territory. For more information on how ARIA is defined see the Information Papers ABS Views on Remoteness, 2001 (Cat. no. 1244.0) and Outcomes of ABS Views on Remoteness consultation, Australia (Cat. no. 1244.0.00.001).
- (c) The rate ratio is calculated by dividing the rate of Indigenous people with a particular condition by the rate of non-Indigenous people with the same condition.
- (d) Difference between Indigenous total 2001 and 2004-05 data is not statistically significant.
- (e) Difference between 2001 Indigenous and non-Indigenous total AS data is not statistically significant.
- (f) Difference between remote and non-remote 2001 data is not statistically significant.
- (g) Statistical testing indicates that this data item is not suitable for age standardisation.
- (h) Difference between remote and non-remote 2004-05 data is not statistically significant.
- (i) Difference between 2004-05 Indigenous and non-Indigenous total AS data is not statistically significant.

na Not available. — Nil or rounded to zero. **RSE** Relative standard error. **AS** Age standardised.

End stage renal diseases (N18–N19, Z49)	22 483	112 954	4 114	335.3	34.9	9.6	
Chronic Obstructive Pulmonary Diseases (J41–J44)	529	10 299	334	12.7	3.4	3.7	

(a) Data are based on state of usual residence.

(b) Indigenous data are reported for Queensland, WA, SA and the NT only. These four jurisdictions are considered to have the highest level of accuracy of Indigenous identification, although the level of accuracy varies by jurisdiction and hospital. Data for these four jurisdictions over-represent indigenous populations in less urbanised and more remote locations. Hospitalisation data for four jurisdictions should not be assumed to represent the hospitalisation experience in the other jurisdictions.

(c) Hospitalisations were based on ICD-10-AM classifications. Principal diagnosis was used to select diseases.

(d) The rates per 1000 population were directly age standardised using the 2001 Australian population.

(e) Includes hospitalisations where Indigenous status was recorded as non-Indigenous or not stated.

(f) The rate ratio is calculated by dividing the Indigenous age standardised rate by the 'other' age standardised rate.

(g) Diseases in this part are sub-chapter level diseases in the ICD-10-AM classification.

na Not applicable.

Table 3A.2.11 Male Indigenous hospitalisations, by chronic disease, per 1000 people, Queensland, WA, SA, and public hospitals in the NT, 2004-05 (a) (b) (c)

	Number of hospitalisations			Age standardised hospitalisation rate (d)		Rate ratio (f)
	Indigenous	Non-Indigenous	Not stated	Indigenous	Other (e)	
Cancer (C00–C96)	663	70 478	7 033	12.1	21.6	0.6
Lung cancer (C33–C34)	107	4 440	299	2.2	1.3	1.6
Cervical cancer (C53)	na	na	na	na	na	na
Mental and behavioural disorders (F00–F99)	2 819	40 688	1 352	23.3	11.3	2.1
Circulatory diseases (I00–I99)	2 687	83 156	7 887	39.8	25.3	1.6
Ischaemic heart diseases (I20–I25)	1 250	33 619	3 601	18.4	10.2	1.8
Stroke (I60–I69)	198	6 808	399	3.3	2.1	1.6
Hypertension (I10–I15)	79	924	66	1.0	0.3	3.6
Rheumatic heart diseases (I05–I09)	63	272	104	0.4	0.1	3.9
Other (g)						
Diabetes (E10–E14)	1 078	12 628	366	15.2	3.6	4.2
End stage renal diseases (N18–N19, Z49)	33 750	153 255	7 395	484.6	44.6	10.9
Chronic Obstructive Pulmonary Diseases (J41–J44)	640	10 540	401	15.7	3.2	4.9

(a) Data are based on state of usual residence.

(b) Indigenous data are reported for Queensland, WA, SA and the NT only. These four jurisdictions are considered to have the highest level of accuracy of Indigenous identification, although the level of accuracy varies by jurisdiction and hospital. Data for these four jurisdictions over-represent Indigenous populations in less urbanised and more remote locations. Hospitalisation data for four jurisdictions should not be assumed to represent the hospitalisation experience in the other jurisdictions.

(c) Hospitalisations were based on ICD-10-AM classifications. Principal diagnosis was used to select diseases.

(d) The rates per 1000 population were directly age standardised using the 2001 Australian population.

(e) Includes hospitalisations where Indigenous status was recorded as non-Indigenous or not stated.

(f) The rate ratio is calculated by dividing the Indigenous age standardised rate by the 'other' age standardised rate.

(g) Diseases in this part are sub-chapter level diseases in the ICD-10-AM classification.

na Not applicable.

- (a) The apparent retention rate is the percentage of full time students who continued to year 9, 10, 11 and 12 from respective cohort groups at the commencement of their secondary schooling (year 7/8).
- (b) Retention rates are affected by factors that vary across jurisdictions, so variations in apparent retention rates over time within jurisdictions may be more useful than comparisons across jurisdictions. Retention rates can exceed 100 per cent for a variety of reasons, including student transfers between government and non-government schools occurring after the base year.
- (c) The exclusion of part time students from standard apparent retention rate calculations has particular implications for the interpretation of results for SA, Tasmania and the NT.
- (d) The small number of Indigenous students in some jurisdictions (the ACT and Tasmania) can result in large fluctuations in the apparent retention rates when disaggregated by gender.

(a) The apparent retention rate is the percentage of full time students who continued to year 9, 10, 11 and 12 from respective cohort groups at the commencement of their secondary schooling (year 7/8). Retention rates are affected by factors that vary across jurisdictions. For this reason, variations in apparent retention rates over time within jurisdictions may be more useful than comparisons across jurisdictions. Retention rates can exceed 100 per cent for a variety of reasons, including student transfers between jurisdictions after the base year.

(b) The exclusion of part time students from standard apparent retention rate calculations has particular implications for the interpretation of results for SA. The exclusion of ungraded students from standard apparent retention rate calculations has particular implications for the NT. Ungraded students may have been graded at the year of commencement of secondary schooling and would have been included in the base year but not included in the current year. Apparent retention rates were higher than expected in Queensland because of a significant net gain in interstate migration compared with other states and territories.

(c) The small number of Indigenous students in some jurisdictions (the ACT and Tasmania) can result in large fluctuations in the apparent retention rates when disaggregated by gender.

Table 3A.3.15

Students achieving a year 12 certificate in 2001 (as a proportion of students who were enrolled in year 11 in the previous year), government and Catholic systems (a) (b) (c)

	<i>Indigenous</i>		<i>Non-Indigenous</i>	
	%	Number of year 12 certificates in 2001	Number of students in year 11 in 2000	%
NSW	70.8	531	873	86.0
Victoria	39.9	76	191	77.1
Queensland (d), (e)	58.4	813	1 245	80.0
WA	22.2	163	557	62.0
SA	59.0	62	210	74.8
Tasmania	70.4	120	228	78.9
ACT	70.4	24	32	78.9
NT	9.9	31	229	36.6
Australia	51.1	1 820	3 565	80.3
				126 021
				156 999

(a) Includes year 12 students who were not in year 11 the previous year, for example, students repeating the year level.

(b) The requirements for the awarding of a year 12 certificate vary in each jurisdiction. Enrolled at the time of the annual national school census in August.

(c) Indigenous Education Strategic Initiatives Programme agreements with Catholic systems in some states and territories include a small number of non-systemic Catholic schools.

(d) Queensland government data for the number of students who attain a year 12 certificate were obtained from the Queensland Studies Authority (QSA), while the number of students who commenced year 11 in 2000 was obtained from Education Queensland (EQ) data. Differences in the way in which students are identified as Indigenous between the QSA and EQ, and other general differences between the collections, results in the numbers of Indigenous senior secondary school students enumerated by the QSA to be typically lower than the number of Indigenous senior secondary school students enumerated by EQ. Typically the QSA data had about 46 per cent fewer Indigenous students than the EQ data set. This suggests that the Queensland government data which contributes to the Queensland outcome in the table may underrepresent the attainment of year 12 certificates by Indigenous students, as a percentage of Indigenous students who commenced year 11.

(e) The non-Indigenous outcome in Queensland is an estimate based on the separate percentages reported by the government and Catholic systems.

– Nil or rounded to zero... Not applicable. **na** Not available.

Total	269.9	100.0	-	14 834.6	100.0	-

- (a) Estimates with a relative standard error (RSE) of 25 per cent to 50 per cent should be used with caution. Estimates with a RSE greater than 50 per cent are considered too unreliable for general use.
- (b) Includes persons who never attended school.
- (c) Difference between Indigenous and Non-Indigenous data is not statistically insignificant.
- (d) Since 2000, the sample in the NT for some social surveys (including the 2004–05 National Health Survey) has been reduced to a level such that NT records contribute appropriately to national estimates but will not support reliable estimates for the NT. This reallocation of resources has enabled a larger NT sample to be used in the General Social Survey and the Indigenous Social Survey conducted periodically by the ABS. As a result, estimates for the NT are not shown separately in these tables.
– Nil or rounded to zero. np Not published.

AS=Age Standardised. RSE=Relative standard error.

- (a) Estimates with a relative standard error of between 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
- (b) The sample size in the NT was considered too small to produce reliable estimates for the NT in the ABS 2004-05 NHS, but NT records in the survey have been attributed appropriately to national estimates.

RSE=Relative standard error.

- (a) Estimates with a relative standard error of between 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
- (b) Equivalised household Income quintile boundaries for the total population as derived from the 2004-05 NHS are: lowest quintile less than \$295 per week; second quintile \$295–\$478 per week; third quintile \$479–\$688 per week; fourth quintile \$689–\$996 per week; highest quintile \$997 or more per week. These have been applied to both the Indigenous and non-Indigenous populations.
- (c) Comprises persons living in households where household income was stated. Note that equivalised gross weekly household income quintiles are calculated as a proportion of households with stated household income.
- (d) Total with household income stated shown as a proportion of the total.
- (e) Includes people who reported no source of income.

— Nil or rounded to zero (including null cells); np Not available for publication but included in total where applicable, unless otherwise indicated.

RSE=Relative standard error.

- (a) Estimates with a relative standard error of between 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
 - (b) Equivalised household Income quintile boundaries for the total population as derived from the 2004-05 NHS are: lowest quintile less than \$295 per week; second quintile \$295–\$478 per week; third quintile \$479–\$688 per week; fourth quintile \$689–\$996 per week; highest quintile \$997 or more per week. These have been applied to both the Indigenous and non-Indigenous populations.
 - (c) Comprises persons living in households where household income was stated. Note that equivalised gross weekly household income quintiles are calculated as a proportion of households with stated household income.
 - (d) Total with household income stated shown as a proportion of the total.
 - (e) Includes people who reported no source of income.
- Nil or rounded to zero (including null cells); .. Not applicable; **na** Not available.

<i>Estimate</i>	<i>Proportion</i>	<i>RSE</i>	<i>Estimate</i>	<i>Proportion</i>	<i>RSE</i>
'000	%	%	'000	%	%

RSE=Relative standard error.

- (a) Estimates with a relative standard error of between 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
- (b) Equivalised household Income quintile boundaries for the total population as derived from the 2004-05 NHS are: lowest quintile less than \$295 per week; second quintile \$295–\$478 per week; third quintile \$479–\$688 per week; fourth quintile \$689–\$996 per week; highest quintile \$997 or more per week. These have been applied to both the Indigenous and non-Indigenous populations.
- (c) Comprises persons living in households where household income was stated. Note that equivalised gross weekly household income quintiles are calculated as a proportion of households with stated household income.
- (d) Total with household income stated shown as a proportion of the total.
- (e) Includes people who reported no source of income.
- Nil or rounded to zero (including null cells); **np** Not available for publication but included in total where applicable, unless otherwise indicated.

All children	4.7	5.3	5.7	6.8	7.9	7.5	7.6

- (a) Rates of children in substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Data from 2002-03 should not be compared previous years. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.
- (c) In 2003-04, NSW was unable to provide data due to ongoing implementation of the new reporting system.
- (d) Implementation of the Children and Community Services Act 2004 in March 2006 required the legal status of children in care to be reviewed and Protection Orders were sought for a number of children already in care but not under care and protection orders.
- (e) Tasmania introduced new intake and assessment guidelines, based on the WA model, in July 1997. These new guidelines were likely to be the main reason for the decline in the number of notifications and substantiations between 1999-00 and 2000-01.
- (f) Care should be taken in interpreting the rates for Indigenous children due to the relatively small size of the Indigenous population.

- (a) Data on deaths of Aboriginal and Torres Strait Islander Australians are affected by differing levels of coverage of deaths identified as Indigenous across states and territories. Care should be exercised in analysing these data, particularly in making comparisons across states and territories and between the Indigenous and non-Indigenous data.
- (b) Data on Indigenous causes of death are not available separately from the ABS for NSW, Victoria, Tasmania and the ACT due to a combination of comparatively small numbers and relatively low coverage of Indigenous deaths.
- (c) Deaths from homicide are defined as causes of death with ICD codes X85–Y09.
- (d) Calculations of rates for the Indigenous population are based on ABS Experimental Projections, Aboriginal and Torres Strait Islander Australians (low series, 2001 base). There are no comparable population data for the non-Indigenous population. Calculations of rates for the non-Indigenous population are based on data derived by subtracting Indigenous population projections from total population estimates and should be used with care.

(a) Remoteness area of homicide based on ABS postal area to remoteness area concordance 2001 [ABS Cat. no. 9921.0]

(b) Homicide includes murder and manslaughter, but excludes driving causing death.

(c) Excludes cases where Indigenous status of victim is unknown or remoteness area of homicide incident is unknown.

(d) Indigenous includes either Aboriginal and/or Torres Strait Islander.

(e) Non-Indigenous includes Caucasian, Asian and Maori/Pacific Islanders.

(f) Population denominators for remoteness areas have been derived by applying the proportions of Indigenous people living in each remoteness area in 2001 to experimental estimates and projections (low series) of the Indigenous population published by the ABS. Non-Indigenous denominators have been derived by applying proportions of non-Indigenous people in each remoteness area in 2001 to non-Indigenous population estimates derived by subtracting ABS Indigenous population projections from the ABS total Estimated Resident Population for each year. Therefore, data should be used with caution.

* Australian total includes one incident occurring in an external Australian territory (Norfolk Island). .. Not applicable.

Y08-Y09: specified and unspecified means	462	936	1 398	1.79	0.13	13.46

(a) Non-fatal refers to records where the hospitalisation was not equal to 'died'. Separations were based on ICD-10-AM classification.

(b) State of usual residence.

(c) Rate per 1000 population was directly age standardised using 2001 Australian population.

(d) Indigenous data are reported for Queensland, Western Australia, South Australia and the Northern Territory only. These four jurisdictions are considered to have the highest level of accuracy of Indigenous identification, although the level of accuracy varies.

(e) Includes hospitalisations where Indigenous status was unknown.

(f) The ratio is equal to the hospitalisation rate for Indigenous persons divided by the hospitalisation rate for non-Indigenous people (which includes Indigenous status not reported).

(g) As more than one external cause can be reported for each hospitalisation, the totals are not the sum of the rows of the table.
— Nil or rounded to zero; np Not published.

Table 3A.11.31

Victims recorded by Queensland Police: selected offence types by Indigenous status, 2005-06 (a) (b) (c) (d) (e) (f)

Number	Indigenous	Non-Indigenous	Unknown	Total
Murder	6	44	5	55
Assault	2 692	16 948	43	19 683
DV related assault	1 047	2 042	3	3 092
Sexual assault	582	4 495	37	5 114
Sexual assault, victims aged 0-15	375	2 443	25	2 843
Robbery	25	1 386	4	1 415

Rate per 100 000 population

Murder	4.3	1.1	na	1.4
Assault	1948.7	437.1	na	490.2
DV related assault	757.9	52.7	na	77.0
Sexual assault	421.3	115.9	na	127.4
Sexual assault, victims aged 0-15	671.5	299.9	na	326.6
Robbery	18.1	35.7	na	35.2

(a) Rates were calculated using population data from ABS 2006, *Population by Age and Sex, Australian States and Territories*, Cat no. 3221.0 and ABS Experimental Indigenous Projections by State, Age and Sex: Low Series (unpublished).

(b) Indigenous status is based on self-identification.

(c) Note that these data do not represent all victims of crime, just those that come to the attention of and whose details are recorded by Queensland Police.

(d) Figures do not provide a unique victim count as one person may be counted several times if they were the victim of more than one offence.

(e) The age of the victims represents the age of the victim at the time of reporting the offence.

(f) The category 'DV related assault' (DV means Domestic Violence) is a subset of 'Assault'. Similarly, the category 'sexual assault against victims 0-15' is a subset of 'sexual assault'.

– Nil or rounded to zero ... Not applicable. na Not available.

Reported offences against the person by victim sex and Indigenous status, Western Australia, 2001 (a) (b)

-
- (a) Aboriginality is derived from the WA Police Identity Code field for ethnic appearance. The field is completed on the basis of the attending police officer's subjective assessment of the person's appearance and is recorded for operational purposes only. Care should be exercised in the interpretation of these statistics, as a subjective assessment means it is possible that a person attributed to a particular group does not belong to that group.
- (b) The ratio of Indigenous to non-Indigenous victims is calculated by dividing the Indigenous victimisation rate by the non-Indigenous victimisation rate. A ratio greater than one implies that Indigenous people are disadvantaged compared to non-Indigenous people.

(a) Includes ACT prisoners held in NSW prisons. The ACT in NSW figures are a subset of the NSW figures and are not separately counted in the Australian totals.

(b) From 2006, excludes breaches of periodic detention orders greater than three months.

(c) The majority of full-time prisoners sentenced in the ACT are held in NSW prisons.

- Nil or rounded to zero.

(a) All data are taken from the census count at 30 June of the relevant year.

(b) For 2001 and 2002, Australian rates were calculated using detainee totals excluding Tasmania and population estimates excluding Tasmania.

(c) Indigenous rates were calculated using high series population data provided by the ABS. Any variation in derived rates may be due to the assumptions and limitations of the base population data. Rates can be highly variable in states and territories with small populations of Indigenous people, small numbers of people in juvenile detention and/or small numbers of Indigenous people in juvenile detention. This particularly applies in Victoria, Tasmania, the ACT and the NT.

Table 3A.12.21

Juvenile detention rate per 100 000, by age (a) (b)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Total juveniles									
10–14 years	na	5.0							
15–17 years	na	60.5							
10–17 years	27.2	11.7	20.6	51.9	31.5	32.7	45.1	39.8	25.5

(a) Numbers of young people in juvenile detention by State and Territory are very small when broken down into the 10–14 years and 15–17 years age groups. It is potentially misleading to provide rates for these two separate age categories because rates fluctuate greatly even with a minimal change in numbers. Thus, the Australian Institute of Criminology (AIC) does not publish these rates in their juveniles in detention annual reports.

(b) Indigenous rates were calculated using high series population data provided by the ABS. Any variation in derived rates may be due to the assumptions and limitations of the base population data. Rates can be highly variable in states and territories with small populations of Indigenous people, small numbers of people in juvenile detention and/or small numbers of Indigenous people in juvenile detention. This particularly applies in Victoria, Tasmania, the ACT and the NT.
