

9A Emergency management — attachment

Definitions for the indicators and descriptors in this attachment are in section 9.8 of the chapter. Data in this Report are examined by the Emergency Management Working Group, but have not been formally audited by the Secretariat. A peer review process is also undertaken by the Emergency Management Working Group in the development of data definitions. Unsourced information was obtained from the Australian, State and Territory governments, with the assistance of the Australasian Fire Authorities Council and the Council of Ambulance Authorities.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Attachment contents

Fire events

- Table 9A.1** Major sources of fire service organisations' funding (2006-07 dollars)
- Table 9A.2** Reported fires and other primary incidents attended to by fire service organisations
- Table 9A.3** Fire service organisations and land management agencies reported total landscape fires (bush and grass) incidents
- Table 9A.4** Accidental residential structure fires reported to fire service organisations per 100 000 households
- Table 9A.5** Fire service organisations' human resources
- Table 9A.6** Fire deaths
- Table 9A.7** Fire injuries
- Table 9A.8** Median dollar loss from structure fire (2006-07 dollars)
- Table 9A.9** Property loss from structure fire (2006-07 dollars per person)
- Table 9A.10** Fire incidents attended by fire service organisations per 100,000 persons
- Table 9A.11** Households with an operational smoke alarm or smoke detector installed
- Table 9A.12** Response times to structure fires (minutes)
- Table 9A.13** Structure fires and response times to structure fires across geographic areas
- Table 9A.14** Structure fires contained to the object or room of origin (per cent)
- Table 9A.15** Fire service organisations' costs (\$'000) (2006-07 dollars),
- Table 9A.16** Fire service organisations' expenditure per 1000 people (2006-07 dollars)
- Table 9A.17** Fire service organisations' funding per 1000 people (2006-07 dollars)

Ambulance Services

- Table 9A.18** Major sources of ambulance service organisations revenue (2006-07 dollars)
- Table 9A.19** Reported ambulance incidents, responses, patients and transport
- Table 9A.20** Ambulance service organisations' human resources
- Table 9A.21** Ambulance assets (number)
- Table 9A.22** Cardiac arrest survived event rate
- Table 9A.23** Ambulance code 1 response times (minutes)
- Table 9A.24** Satisfaction with ambulance service organisations
- Table 9A.25** Ambulance service costs (\$'000) (2006-07 dollars)
- Table 9A.26** Ambulance service organisations' expenditure per 1000 people (2006-07 dollars)
- Table 9A.27** Ambulance service organisations' revenue per 1000 people (2006-07 dollars)

Road Rescue services

- Table 9A.28** Reported road rescue incidents
- Table 9A.29** Reported number of road rescue extrications

SESTES services

- Table 9A.30** SES/TES volunteer human resources (number)

Other information

- Table 9A.31** Communications and dispatching systems

Table 9A.1

Table 9A.1 Major sources of fire service organisations' funding (2006-07 dollars) (a)

	<i>Unit</i>	<i>NSW</i>	<i>Vic (b)</i>	<i>Q/d</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT (c)</i>	<i>NT</i>	<i>Total</i>
(a) Funding levels are adjusted using the Australian Bureau of Statistics (ABS) GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure. Due to differences in definitions and counting rules, data reported may differ from those in agency annual reports and other sources. Totals may not sum as a result of rounding.										
(b)										
	Vic: The proportions of principal funding contributions from State Governments, local governments and insurance companies are established in legislation. The actual proportions received may vary as a result of the level of income from user charges and other income sources. The 2006-07 year is the first in which the Victorian data includes revenue for the Department of Sustainability and Environment (DSE) and explains the marked increase in the Total government grants' item for that year.									
(c)										
	ACT: The increase in 2005-06 is due to a significant upgrade of Emergency Services Communications systems and inclusion of Joint Emergency Services Training Costs. In 2006-07 funding is included under 'miscellaneous revenue' for the placement of an Ericson sky crane in the ACT as part of the National Aerial Firefighting Strategy.									
	na Not available – Nil or rounded to zero.									

Source: State and Territory Governments (unpublished).

- (a) Data in this table may be different to other tables in the chapter as these data only reflect responses from fire service organisations. These data report the type of incident that reflects the most serious situation as determined by operational personnel after arriving at the scene and not the incident type relayed by the communication centre.
- (b) Vic: Landscape fires data include incidents from the Department of Sustainability and Environment from 2004-05 onwards. Due to data collection issues, data is incomplete for 2005-06. Some degree of duplicate counting may be present across Country Fire Authority and Department of Sustainability and Environment figures. This will be resolved in the 2007-08 data return.
- (c) Qld: Accurate identification of incidents attended by both QFRS Urban and Rural crews is not possible at this stage. Reporting of incident attendance by QFRS Rural Crews is incomplete due to voluntary reporting procedures.
- (d) WA: Data includes reported turnouts by career and volunteer services for all areas of the State.
- (e) SA: MFS industrial action: 18/4/05 0800 hrs to 20/06/05 1800 hrs (no incident reports completed during this period).
- (f) Tas: Figures include data provided by *all* fire brigades, both full-time and volunteer.
- (g) ACT: The January 2003 bushfires included in the 2002-03 data have been counted as one event.
- na Not available. — Nil or rounded to zero.
- Source: State and Territory governments (unpublished).

Table 9A.3

Table 9A.3 Fire service organisations and land management agencies reported total landscape fires (bush and grass) incidents (a)

		NSW (b)	Vic (c)	Qld (d)	WA (e)	SA (f)	Tas (g)	ACT (h)	NT (i)	Aust
2002-03	no.	21 942	8 862	13 042	9 597	3 642	2 737	623	2 137	62 582
2003-04	no.	16 529	6 835	9 376	8 740	3 182	2 273	238	1 704	48 877
2004-05	no.	21 014	6 462	12 989	7 962	2 877	2 133	217	1 882	55 536
2005-06	no.	19 806	5 534	8 780	6 981	2 371	1 775	263	1 338	46 848
2006-07	no.	17 993	10 008	10 912	7 836	3 170	2 441	481	1 714	54 555

- (a) These data may be different to those reported elsewhere in the chapter because these data reflect responses from fire service organisations and other services for some jurisdictions.
- (b) NSW: Data include fires from the NSW Department of Environment and Conservation, the NSW Rural Fire Service and the NSW Fire Brigades for all bush and grass fires regardless of size or area burnt.
- (c) Vic: Due to data collection issues, data for 2005-06 are incomplete. Landscape fires data include incidents from the department of Sustainability and Environment from 2004-05 onwards. Some degree of duplicate counting may be present across Country Fire Authority and Department of Sustainability and Environment figures. This will be resolved in the 2008-09 data return.
- (d) Qld: Accurate identification of incidents attended by both QFRS Urban and Rural crews is not possible at this stage. Reporting of incident attendance by QFRS Rural Crews is incomplete due to voluntary reporting procedures.
- (e) WA: Data also includes landscape fire reported to the Department of Environment and Conservation as the lead agency, with 493 fires included for 2006-07.
- (f) SA: MFS industrial action : 18/4/05 0800 hrs to 20/06/05 1800 hrs (no incident reports in this period).
- (g) Tas: Figures supplied include *all* vegetation fires, regardless of size, from all fire brigades (full time and volunteer) and land management agencies.
- (h) ACT: The January 2003 bushfires included in the 2002-03 data have been counted as one event.
- (i) NT: Data excludes the Bushfires NT and some NT Fire and Rescue Service volunteer brigades.

Source: State and Territory governments (unpublished).

Table 9A.4

Table 9A.4 Accidental residential structure fires reported to fire service organisations per 100 000 households (a)

	NSW	Vic (b)	Qld (c)	WA	SA (d)	Tas	ACT	NT	Aust
2002-03	131.9	146.4	74.1	75.0	88.9	203.1	na	52.2	114.1
2003-04	136.5	147.8	69.1	68.3	80.0	185.3	105.7	47.6	114.9
2004-05	131.3	142.4	62.5	76.7	64.7	177.0	89.4	39.7	109.7
2005-06	138.1	113.6	72.9	70.9	52.4	173.4	114.2	54.0	105.9
2006-07	120.7	140.8	62.7	70.5	46.8	159.1	106.9	49.3	103.4

- (a) This measure may not be entirely comparable. the rate of accidental residential structure fires is affected by the number of fires where the cause has been determined and classified by fire service personnel. The data series for the estimated number of households used in calculations for this table, is currently under review by the ABS. As a result, the series has not been updated recently. Accordingly, the household numbers used in the calculations for this table have remained the same for the last 5 years.
- (b) Vic: Due to data collection issues, data is incomplete for 2005-06.
- (c) Qld: QFRS Rural Incident Database does not currently record the necessary information to calculate this measure. QFRS Urban stations (Agency 1) are estimated to serve 87.6 per cent of Queensland's population.
- (d) SA: MFS industrial action: 18/04/05 0800 hrs to 20/06/05 1800 hrs (no incident reports completed during this period). SA is under reported because MFS data entry was not completed by the submission deadline.

(a) FTE = full time equivalent.

(b) NSW: Numbers for fire service organisations include retained (part-time) firefighters and community fire unit members.

(c) Vic: Victoria's land management agency, the Department of Sustainability and Environment is included from 2005-06. Availability figures for the Country Fire Authority are not included due to data collection issues.

(d) Qld: Firefighting personnel include senior fire officers, Assistant and Deputy Commissioners and the Commissioner. Volunteer firefighter data for Queensland include volunteer rural firefighters and support personnel as a mix.

(e) WA: Re firefighting personnel, FESA provides a wide range of emergency services under an integrated management structure. It has become increasingly complex to segregate data for individual emergency activities. From 2006-07, data reflects all emergency services including SES and volunteer marine rescue services. FESA's support personnel are not segregated by service so that data for 2006-07 includes all non-fire specific support staff. With respect to volunteer firefighters, data for 2006-07 includes volunteers from local government bush fire brigades, volunteer fire and rescue brigades, volunteer fire services and multi-skilled volunteer emergency services.

(a) Fire deaths published in the 2008 Report for the years 1999 to 2003 inclusive, differ slightly from those published in earlier reports because ABS revisions for those years have now been incorporated. Cells in this table have been randomly adjusted to avoid the release of confidential data. Where necessary, totals have been adjusted separately to the component cells and revised totals are not necessarily the sum of the component cells. Cause of Death is coded according to the International Classification of Diseases and Related Health Problems Revision 10 (ICD-10).

(b) Fire deaths data are reported by the State or Territory of the deceased's usual residence, and by the year the death was registered.

(c) The small number of deaths means it is difficult to establish patterns and provide detailed analysis.

(d) Includes Other Territories.

(e) Calculated using the Estimated Resident Population at 30 June. For example, population data at June 2005 used for calculating 2005 rate.

np Not published

- (a) Fire injuries data published in the 2008 Report differ for all years from that published in earlier reports because counting rules for fire injury data have now been more closely aligned with those for fire deaths data. Fire injuries are coded according to the International Classification of Diseases and Related Health Problems Revision 10 (ICD-10). The scope of the fire injuries data published has been expanded to include ICD fire injury codes X00-X09 plus X76, X97 and Y26 in the number of fire injuries reported. Fire injuries are defined as the number of persons admitted to public and private hospitals with fire related injuries. Fire injuries are reported by the State or Territory where the injury is treated. Excludes secondary fires resulting from explosions, transport accidents, and emergency department non-admitted casualties.
- (b) Population estimates at 30 June. For example, population data at 30 June 2005 have been used as the population estimate for 2005-06.

np Not published. **na** Not available.

Table 9A.8 Median dollar loss from structure fire (2006-07 dollars) (a)

	NSW (b)	Vic (c)	Qld (d)	WA	SA	Tas (e)	ACT (f)	NT
Median dollar loss per structure fire								
2002-03	2 358	708	1 179	2 948	4 717	5 896	2 358	5 896
2003-04	2 283	685	2 283	3 425	3 425	3 995	2 283	3 139
2004-05	2 195	1 098	2 195	3 293	5 488	4 391	1 427	2 195
2005-06	2 096	1 048	2 096	3 145	5 241	3 145	2 096	2 096
2006-07	2 000	1 000	2 000	3 000	8 000	3 150	1 175	3 000

- (a) Dollar loss values adjusted using the ABS GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure. Estimates have not been validated by the insurance industry, or adjusted for interstate valuation differences.
- (b) NSW: In 2004-05 there were 17 structure fires that resulted in direct dollar loss in excess of \$1 million each. In 2005-06 there were 32 structure fires that resulted in direct dollar loss of \$1 million each. Of these fires, five resulted in direct dollar loss in excess of \$10 million each and one of \$89 million.
- (c) Vic: Due to data collection issues, data is incomplete for 2005-06.
- (d) Qld: Accurate identification of incidents attended by both QFRS Urban and Rural crews is not possible at this stage. Reporting of incident attendance by QFRS Rural Crews is incomplete due to voluntary reporting procedures.
- (e) Tas: Figures supplied include data provided by *all* fire brigades, both full-time and volunteer. Property loss does not include losses as a result of vegetation fires.
- (f) ACT: Data for 2002-03 exclude the January 2003 wildfires, which destroyed over 500 houses and resulted in losses in excess of \$200 million.

Source: State and Territory governments (unpublished).

Table 9A.9

Table 9A.9 **Property loss from structure fire (2006-07 dollars per person) (a)**

	NSW(b)	Vic(c)	Qld(d)	WA	SA(e)	Tas(f)	ACT(g)	NT	Aust(h)
Property loss from structure fire

2003-04	32	25	27	25	23	49	30	13	27
2004-05	29	40	28	25	32	53	22	17	33
2005-06	65	34	29	23	19	70	34	30	42
2006-07	25	36	23	34	27	46	21	11	29
Three year average									
2002-03 to 2004-05	30	27	29	26	28	43	27	17	29
2003-04 to 2005-06	42	33	28	24	24	58	28	20	34
2004-05 to 2006-07	40	37	27	27	26	57	25	19	34

- (a) Property loss values adjusted using ABS GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure. Estimates have not been validated by the insurance industry or adjusted for interstate valuation differences.
- (b) NSW: In 2004-05 there were 17 structure fires that resulted in direct dollar loss in excess of \$1 million each. In 2005-06 there were 32 structure fires that resulted in excess of \$1 million each. Of these fires, five resulted in direct dollar loss in excess of \$10 million each and one of \$89 million.
- (c) Vic: Due to data collection issues, data is incomplete for 2005-06.
- (d) Qld: Accurate identification of incidents attended by both QFRS Urban and Rural crews is not possible at this stage. Reporting of incident attendance by QFRS Rural Crews is incomplete due to voluntary reporting procedures. QFRS Urban stations (Agency 1) are estimated to serve 87.6 per cent of Queensland's population.
- (e) SA: In 2006-07 there was a \$15 million fire that accounted for 35 per cent of the reported dollar loss.
- (f) Tas: Figures supplied include data provided by *all* fire brigades, both full time and volunteer. Due to small population size, figures are affected by single large-loss events. Significant increases have also been experienced due to rapidly rising property prices. Property loss does not include losses as a result of vegetation fires.
- (g) ACT: Data for 2002-03 exclude the January 2003 wildfires, which destroyed over 500 houses and resulted in losses in excess of \$200 million.
- (h) Average for Australia excludes rural fire service data for some years as per the jurisdictions' caveats.

Source: ABS *Australian Demographic Statistics*, Cat. no. 3101.0 (unpublished); State and Territory governments (unpublished).

Table 9A.10

Table 9A.10 Fire incidents attended by fire service organisations per 100,000 persons (a)

Unit	NSW	Vic (c)	Qld (d)	WA (e)	SA	Tas (f)	ACT (g)	NT (h)	Aust (i)
Incidents per 100 000 persons (b)									
2002-03	707	501	561	763	585	1 000	478	1 279	634
2003-04	622	434	452	710	573	848	309	1 045	552
2004-05	642	416	530	684	501	842	318	1 141	562
2005-06	682	401	420	575	494	787	386	890	536
2006-07	634	534	469	628	577	952	478	1 070	581
Population (million) (j)									
2002-03	6.6	4.9	3.7	1.9	1.5	0.5	0.3	0.2	19.7
2003-04	6.7	4.9	3.8	2.0	1.5	0.5	0.3	0.2	19.9
2004-05	6.7	5.0	3.9	2.0	1.5	0.5	0.3	0.2	20.1
2005-06	6.8	5.1	4.0	2.0	1.6	0.5	0.3	0.2	20.4
2006-07	6.8	5.1	4.1	2.1	1.6	0.5	0.3	0.2	20.7

- (a) Fire incidents data include landscape fire incidents attended by fire service organisations.
- (b) The Estimated Resident Population (ERP) data for Australian jurisdictions is based on Census data. The ERP for the intervening years since the 2001 Census have now all been updated using 2006 Census data. As a result, calculations per 100 000 persons will differ slightly from those published in previous ROGS reports.
- (c) Vic: Due to data collection issues, data for 2005-06 are incomplete. Landscape fires data include incidents from the department of Sustainability and Environment from 2004-05 onwards. Some degree of duplicate counting may be present across Country Fire Authority and Department of Sustainability and Environment figures. This will be resolved in the 2008-09 data return.
- (d) Qld: Accurate identification of incidents attended by both QFRS Urban and Rural crews is not possible at this stage. Reporting of incident attendance by QFRS Rural Crews is incomplete due to voluntary reporting procedures.
- (e) WA: Data includes reported turnouts by career and volunteer services to fire.
- (f) Tas: Figures supplied include data provided by *all* fire brigades, both full-time and volunteer.
- (g) ACT: Includes data for urban and rural fire service organisations.
- (h) NT: The higher number of incidents per 100 000 persons in 2006-07 can be attributed to the large number of grass fires in Northern Australia caused by a large wet season during the reporting period.
- (i) The average for Australia excludes rural fire service data for some years as per the jurisdictions' caveats.
- (j) Population data relate to 30 June, so that estimated resident population at 30 June 2005 is used as the denominator for 2005-06.

Source: ABS *Australian Demographic Statistics*, Cat. no. 3101.0 (unpublished); State and Territory governments (unpublished).

Table 9A.11

Table 9A.11 Households with an operational smoke alarm or smoke detector installed

-
- (a) NSW: The Building Legislation Amendment (Smoke Alarms) Act 2005 and the Environmental Planning and assessment Amendment (Smoke Alarms) regulation 2006 commenced on 1 May 2006 and requires: the installation of one or more smoke alarms in buildings in which persons sleep; smoke alarms in such buildings must be operational; and persons do not remove or interfere with the operation of smoke alarms installed in such buildings. The data for 2006-07 are sourced from the NSW Population Health Survey (HOIST), Centre for Epidemiology and Research, NSW Department of Health and represents the full 12 month period of 2006. Estimates are based on 7795 respondents in NSW. For this indicator 164 (2.06 per cent) were 'not stated' (Don't know or Refused) in NSW. The indicator includes those who have a smoke alarm or detector in their home. The question used to define the indicator was: Do you have smoke alarms installed in your home? The 95 per cent confidence interval for 2006 is (85.8 - 87.9). In general, a wider confidence interval reflects less certainty in the indicator estimate.
 - (b) Vic: Data are sourced from a random telephone survey of 2304 respondents residing within the 23 local government areas significant to the metropolitan fire district. MFESB Commissioned Crime Prevention Victoria to develop a survey around fire safety issues through their Local Safety Survey. 2004-05 data are based on the results of the most recent survey conducted in April 2004.
 - (c) Qld: Data collected by the Office of Economic and Statistical Research as part of the November 2005 Queensland Household Survey. The figure is an estimate for the whole population of Queensland.
 - (d) WA: Data for 2002-03 collected by market research organisation (random telephone survey with residents of Perth households). 2003-04 market research also done by telephone survey. Apparent fall in percentage for 2004-05 data reflects more stringent survey design and collection by the Australian Bureau of Statistics: ABS Home Safety and Security, Western Australia, 4526.5.55.001, April 2005. Data last collected in 2005-06. The next survey is to be conducted in 2007-08.
 - (e) SA: No data available.
 - (f) Tas: No data available.
 - (g) ACT: No data available.
 - (h) NT: No survey carried out during the reporting period.
 - (i) The February 2000 to November 2000 data are from the Population Survey Monitor (PSM) and represent the last occasion on which smoke alarm data were collected for all jurisdictions. The PSM was subsequently discontinued and, from 2002-03 onwards, the data were sourced from jurisdictional collections that were not strictly comparable with the PSM because of methodological differences.

- (a) Differences between jurisdictions in definitions of response times, geography, personnel mix, and system type (manual or CAD), affect the comparability of response times data.
- (b) Qld: Code 30 Incidents have been excluded from all response time calculations. Two incidents were unable to be classified by remoteness and have been removed from calculation. Response times for QFRS Rural brigade crews are not included as response times are not accurately recorded. Only primary exposure incidents are included.
- (c) WA: Response times in major cities, regional and remote areas are influenced by volunteer data that, particularly in remote areas of the State, are influenced by significant travel time to incidents. The number of structure fires reported is less than in table 9A.2 because response times are calculated only for reports where attendance times have been noted.
- (d) Tas: Includes data provided by *all* fire brigades, both full-time and volunteer.

Source: State and Territory governments (unpublished).

- (a) Differences between jurisdictions in definitions of response times, geography, personnel mix, and system type (manual or CAD), affect the comparability of response times data.
- (b) Data may differ from that in Table 8A.2 because some jurisdictions have excluded reports with incomplete time details.
- (c) Vic: Due to the small number of remote structure fires, observed response time data may vary widely from year to year.
- (d) Qld: Code 30 Incidents have been excluded from all response time calculations. Two incidents were unable to be classified by remoteness and have been removed from calculation. Response times for QFRS Rural brigade crews are not included as response times are not accurately recorded. Only primary exposure incidents are included.
- (e) WA: Response times in major cities, regional and remote areas are influenced by volunteer data, which, particularly in remote areas of the State, are impacted by significant travel time to incidents.

(f)	SA: The Country Fire Service and the Metropolitan Fire Service do not have geocoded data. SA data include incident records with both alarm and arrival times. Excludes response times of 12 hours or more. In 2006-07, the high 90th percentile figure for the 'Very remote' category is due to a small number of reported incidents (12), with one incident reporting a response time of approximately 3 hours.								
(g)	Tas: Includes data provided by <i>all</i> fire brigades, both full-time and volunteer.								
(h)	ACT: All reported fires were within the major city.

(a) Cost levels are adjusted using the Australian Bureau of Statistics (ABS) GDP price deflator 2006-07 = 100 (table AA26) to arrive at a constant price measure. Due to differences in definitions and counting rules, data reported may differ from those in agency annual reports and other sources. Totals may not sum as a result of rounding.

(b) Vic: MFB user cost of capital increase is related to June 2005 revaluations of \$34 million and the 8 per cent cost of capital calculation. Increase in other revenue is due to recharges to CFA (approximately \$2.5 million) for fibre optic communications/ICs support (SAP etc). Training costs for CFA do not represent the total training costs. Personnel and other costs associated with this item are included under other expense headings. The 2006-07 year is the first in which the Victorian data includes costs for the Department of Sustainability and Environment (DSE) and explains the marked increase in the 'Other costs' item for that year.

(c) WA: FESA provides a wide range of emergency services under an integrated management structure. FESA's staff, capital, and other cost data cannot be segregated by service and for 2006-07 includes costs for all staff including SES and volunteer marine rescue.

(d) SA: Asset values for 2002-03 include an asset transfer from local government.

(e) ACT: The increase in 2005-06 is due to a significant upgrade of Emergency Services Communications systems and inclusion of Joint Emergency Services Training Costs. In 2006-07 funding is included under 'Miscellaneous revenue' for the placement of an Ericson sky crane in the ACT as part of the National Aerial Firefighting Strategy.

(f) NT: User cost of capital in the NT includes assets for the NT Fire and Rescue Service only, and other revenue includes Bushfires NT only.

(g) The user cost of capital is partly dependent on depreciation and asset revaluation methods employed. Details of the treatment of assets by emergency management agencies across jurisdictions are outlined in table 9A.28.

(a) Expenditure levels are adjusted using the Australian Bureau of Statistics (ABS) GDP price deflator 2005-06 = 100 (table A.26) to arrive at a constant price measure. Due to differences in definitions and counting rules, data reported may differ from those in agency annual reports and other sources. Totals may not sum as a result of rounding. Figures exclude the user cost of capital associated with land, interest on borrowings and payroll tax. Total fire expenditure includes levies on insurance companies and property owners, user charges, fundraising and donations and indirect revenue.

(b) NSW: Figures vary from year to year as a result of abnormal grants for specific major emergencies.

Table 9A.16

Fire service organisations' expenditure per 1000 people (2006-07 dollars) (a)

-
- (c) Vic: The 2006-07 year is the first in which the Victorian data includes expenditure for the Department of Sustainability and Environment (DSE) and explains the marked increase for that year.
- (d) WA: FEPA provides a wide range of emergency services under an integrated management structure. Data for 2006-07 cannot be segregated by service and includes SES and volunteer marine services as well as fire.
- (e) ACT: The increase in 2005-06 is due to a significant upgrade of Emergency Services Communications systems and inclusion of Joint Emergency Services Training Costs. In 2006-07 funding is included under 'miscellaneous revenue' for the placement of an Ericsson sky crane in the ACT as part of the National Aerial Firefighting Strategy.

(a) Funding levels are adjusted using the Australian Bureau of Statistics (ABS) GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure. Totals may not add as a result of rounding.

(b) NSW: Figures vary from year to year as a result of abnormal grants for specific major emergencies.

(c) Vic: The 2006-07 year is the first in which the Victorian data includes revenue for the Department of Sustainability and Environment (DSE) and explains the marked increase for that year.

(d) WA: FESA provides a wide range of emergency services under an integrated management structure. Data for 2006-07 cannot be segregated by service and includes SES and volunteer marine services as well as fire. A property-based Emergency Services Levy (ESL) was introduced in WA on 1 July 2003; insurance levies ended on 31 December 2003. The first full year of ESL funding was 2004-05. The ESL provides for delivery of all emergency services except for volunteer marine rescue. Data prior to 2003-04 relates to fire only and does not include funding for local government bush fire brigades.

(e) ACT: The increase in 2005-06 is due to a significant upgrade of Emergency Services Communications systems and inclusion of Joint Emergency Services Training Costs. In 2006-07 funding is included under 'miscellaneous revenue' for the placement of an Ericson sky crane in the ACT as part of the National Aerial Firefighting Strategy.

– Nil or rounded to zero.

(a) Funding levels are adjusted using the ABS GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure. Due to differences in definitions and counting rules, data reported may differ from data in agency annual reports and other sources.											
(b)	NSW has a subscription scheme but funds are deposited to the consolidated revenue of the NSW Treasury.										
(c)	Victoria's 2002-03 other revenue includes profit on sale of non current assets of \$489 million.										
(d)	Other revenue is equal to the sum of subscriptions, donations and miscellaneous revenue.										
na	Not available. – Nil or rounded to zero.										

Source: ABS Cat. no. 3303.0 (unpublished), State and Territory governments (unpublished).

Flying hours rotary wing	'000 hrs	6	2	—	1	—	0	1	—	10

(a) An incident is an event that results in a demand for ambulance resources to respond. An ambulance response is a vehicle or vehicles sent to an incident.

There may be multiple responses/vehicles sent to a single incident. A patient is someone assessed, treated or transported by the ambulance service.

(b) Prior to 2005-06, NSW did not triage emergency calls. Urgent incident and response caseload are included in emergency caseload figures. In 2005-06, the introduction of medical prioritisation has allowed for the separation of emergency and urgent activity.

(c) In Victorian Metropolitan Ambulance Service (MAS), incidents, responses and patients transported include road incidents only. In 2004-05 there were 4205 fixed wing air ambulance incidents and 1811 rotary wing incidents. In 2005-06 there were 4674 fixed wing air ambulance incidents and 1799 rotary wing incidents. There were 4187 patients transported by fixed wing aircraft and 1274 by rotary wing. In 2006-07 there were 4544 fixed wing air ambulance incidents and 1682 rotary wing.

(d) For Queensland, 2002-03 incidents, response and patient data are extracted from Ambulance Integrated Information Management System (AIMS database), based on patient care records. Incident and response data for 2003-04 are extracted from Queensland Ambulance Case Information Reporting (QACIR) system using Computer Aided Dispatch data, consequently data is not directly comparable. Total fleet road kilometres include operational vehicles only.

(e) WA does not have a policy of automatically dispatching more than one unit to an incident unless advised of more than one patient. Separate statistics are not kept for incidents and responses. Numbers shown under incidents are cases.

Table 9A.19

Table 9A.19 **Reported ambulance incidents, responses, patients and transport (a)**

	<i>Unit</i>	<i>NSW (b)</i>	<i>Vic (c)</i>	<i>Qld (d)</i>	<i>WA (e)</i>	<i>SA (f)</i>	<i>Tas (g)</i>	<i>ACT</i>	<i>NT (h)</i>	<i>Aust</i>
(f)	For South Australia, prior to 2006-07 incidents, response and patient data was based on patient case cards. Incidents, response and patient data for 2006-07 is extracted from South Australian Ambulance Computer Aided Dispatch data and is more aligned to the definitions provided by the CAA. As a result in some areas the data is not directly comparable with prior years. MAS: Road incidents only. Air Ambulance: 4,544 fixed with, 1682 rotary.									
(g)	For Tasmania, the number of patients transported in 2003-04 is under counted due to an extended period of industrial action resulting in loss of data.									
(h)	For the NT, a response is counted as an incident. Incident data for the NT was not collected in 2003-04. In 2005-06 incident data were unavailable as data is not recorded on the JESC system and all cases are considered an incident.									
(i)	No jurisdiction had casualty room attendance incidents for 2002-03.									
(j)	Data for incidents per 100 000 people are not available for NT and are not included in the rate for Australia.									
	na Not available .. Not applicable. – Nil or rounded to zero.

Table 9A.20 Ambulance service organisations' human resources (a)

	<i>Unit</i>	<i>NSW</i>	<i>Vic (a)</i>	<i>Qld (b)</i>	<i>WA (c)</i>	<i>SA (d)</i>	<i>Tas (e)</i>	<i>ACT (f)</i>	<i>NT</i>	<i>Aust</i>
(a) Vic: Data on volunteers includes some remunerated volunteers. These volunteers were remunerated for some time (usually response), but not for other time (usually on-call time).										
(b) Qld: Operational support personnel include station officers.										
(c) WA: The comparatively high number of volunteers in the operational and corporate support category arises from including staff involved in the provision of the public First Aid services division. This division accounts for 45.7 FTE of corporate personnel.										
(d) SA volunteers data are approximated.										
(e) Tas: The number of non remunerated volunteer ambulance operatives was 448 in 2004-05, down from 567 in the preceding year due to (a) the exclusion of district health hospital staff trained to volunteer level, and (b) inactive volunteers. In Tasmania, clinical other relates to part time doctors.										
(f) ACT: Includes attribution of Emergency Service Agency Staff; on 1 July 2006 the ESA was re-absorbed into the Department of Justice & Community Safety and the ACT Government centralised Finance and HR staff in a Shared Service Centre.										
FTE = full time equivalent. – Nil or rounded to zero.

Total	1 410	935	1 103	498	339	131	32	52	4 500

- (a) Differences in geography, topography and operational structures require different resourcing models across jurisdictions.
- (b) Vic: General purpose ambulances exclude contractors' nonemergency vehicles and special operations vehicles include four fixed wing and three rotary wing aircraft under contract. In 2002-03 data some operational support vehicles are utilised for patient transport work. In 2006-07 for Victorian Metropolitan Ambulance Service (MAS), two ambulances have been excluded as they have been loaned for student training purposes only and are not used for responding.
- (c) Qld: Some response locations are co-located with other facilities. All communication centres are co-located with other facilities. Administration, education and fleet management (other) facilities are co-located with other facilities. QAS is not able to provide a count of stations where there is a mixed (paid and voluntary) workforce.
- (d) ACT: For 2006-07 the ESA provided shared HQ/Comcen, Fleet Workshop and Store/Logistics Centre to all four operational agencies (ambulance, urban fire, rural fire, and SES).
 - Nil or rounded to zero.

- (a) A number of States who previously reported data were unable to report in 2005-06 due to changes in definitions. For the out of hospital setting, survived event means sustained ROSC with spontaneous circulation until administration and transfer of care to the medical staff at the receiving hospital (Jacobs, et al. 2004). Note that this does not reflect the proportion of patients who will survive to be discharged from hospital alive.
- (b) Vic: Excludes patients with unknown rhythm on arrival at hospital.
- (c) Relates to the percentage of patients aged 16 years and over who were in out-of-hospital cardiac arrest (excluding paramedic witnessed) where any chest compressions and/or defibrillation was undertaken by ambulance/EMS personnel who have a return of spontaneous circulation (ROSC) on arrival at hospital.
- (d) This category is a further breakdown of cardiac arrest data defined as the percentage of patients aged 16 years or over who were in out-of-hospital cardiac arrest (excluding paramedic witnessed) where the arrest rhythm on the first ECG assessment was either Ventricular Fibrillation or Ventricular Tachycardia who have a return of spontaneous circulation (ROSC) on arrival at hospital.

2005-06	16.6	14.0	15.0	15.4	15.2	15.3	13.3	21.0
2006-07	20.0	15.0	15.0	14.9	14.4	15.6	14.2	20.5

- (a) Differences between jurisdictions in definitions of response times, geography, personnel mix, and system type for capturing data, affect the comparability of response times data. Ambulance service response times are recorded commencing from varying time points. For 2006-07 response times commence from the following: RAV; receipt of call: SA, MAS, and Tas; first key stroke: ACT; incident creation: NSW, QAS and WA; transfer to dispatch: and NT; crew dispatched.
- (b) NSW: Prior to 2005-06, NSW did not triage emergency calls. Results for code 1 cases represent '000' and urgent medical incidents. In 2005-06 the introduction of medical prioritisation has allowed for separation of emergency and urgent activity.
- (c) Vic: Data is incomplete for both 2003-04 and 2004-05 due to industrial action in the months of June and July 2004.
- (d) Qld: Casualty room attendances are not included in response count and, therefore, are not reflected in response times data. Response times are reported from the computer aided dispatch data.
- (e) SA: Prior to 2006-07 code 1 response times were calculated on all responses to category 1 and 2 cases and based on patient case cards. Code 1 response times for 2006-07 are now calculated from South Australian Ambulance Computer Aided Dispatch data and are more aligned to the definitions provided by the CAA. Code 1 response times for 2006-07 exclude second and subsequent vehicles arriving at an incident and exclude incidents where the category of dispatch was upgraded. As a result, the data are not directly comparable with prior years.
- (f) Tas: Has the highest proportion of population in small rural areas.

np Not published.

Patients not surveyed (c)	'000	888	615	620	172	203	48	26	28	2 599

(a) These results are from a survey distributed to 1 300 code 1 and code 2 patients (Emergency and Urgent).

(b) Total patients is copied from table 9A.19. It is equal to the sum of the number of patients transported plus the number treated and not transported.

(c) No. of patients not surveyed is equal to the total number of patients (those transported plus those not transported) minus the patients who were surveyed.
na Not available. — Nil or rounded to zero.

(a) Cost levels are adjusted using the Australian Bureau of Statistics (ABS) GDP price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure.

(b) Tas: The service is part of the Department of Health and Human Services and sources corporate support services from the Department. The value of other assets reported in 2004-05 was overstated. It included the value of land that was already reported separately.

(c) ACT: For 2005-06, the Ambulance Service data has been collated using the new Emergency Services Agency Capability Model, which utilises a different cost attribution model for shared costs across the Emergency Services Agency. Therefore, the financial figures for 2005-06 cannot be directly compared with those of previous years.

(d) In the NT, all property holding assets are held under a separate entity to St John Ambulance NT.

(e) Payroll tax is excluded from labour costs.

(f) The user cost of capital is partly dependent on depreciation and asset revaluation methods employed. Details of the treatment of assets by emergency management agencies across jurisdictions are outlined in table 8A.37.

(g) Excludes the user cost of capital for land, and interest on borrowings.

(h) Vic: From 1 July 2006 Victorian Metropolitan Ambulance Service (MAS) was exempt from Payroll Tax.

na Not available. – Nil or rounded to zero.

- (a) Total government ambulance expenditure per person was reported in the 2004 Report for the first time, replacing total ambulance service organisation expenditure less indirect government and non-government revenue per person. Non-government revenue is now termed other revenue because some items in this category (for example, Veterans' Affairs) are not strictly non-government. Expenditure levels are adjusted using the Australian Bureau of Statistics (ABS) price deflator 2006-07 = 100 (table AA.26) to arrive at a constant price measure.
- (b) Tasmanian expenditure data for 2000-01 are provided on a full accrual basis and exclude expenditure on administration of the ambulance subscription scheme, hospital based transport services, independent ambulance services, first aid training and clinic transport services.
- (c) For 2005-06, the ACT Ambulance Service data has been collated using the new Emergency Services Agency Capability Model, which utilises a different cost attribution model for shared costs across the Emergency Services Agency. Therefore, the financial figures for 2005-06 cannot be directly compared with those of previous years.

2006-07	75.6	33.3	50.5	24.9	34.4	25.7	150.6	168.8	51.4

(a) Vic: Due to data collection issues, data is incomplete for 2005-06.

(b) Qld: QFRS Rural Incident Database does not currently record the necessary information to calculate this measure.

(c) WA: The apparent rise in the number of road rescue extrications in 2006-07 is due to improved data auditing.

(d) SA: SASES extrications are not available for 2004-05.

(e) ACT: There has been an increasing trend toward requiring extrication at road accident rescues.

(f) Vehicle numbers for the two most recent years in this series, are taken from the ABS Motor Vehicle Census Cat. No. 9309.0, p. 10, published 31 March 2006. Vehicle numbers reported by ABS for the 2005 and 2006 calendar years are used as proxies for the 2005-06 and 2006-07 financial years. As a result of drawing vehicle numbers from the ABS publication in this way, the extrication rates shown here for the 2005-06 financial year differ from those published for that year in the 2007 ROGS Report.

na Not available.

- (a) NSW: A computer aided dispatch system is being implemented for ambulance services in NSW. The NSW Fire Brigades operate a communications and dispatch system for both the Fire Brigades and the Rural Fire Service.
- (b) Vic: Further development includes technological enhancement of mobile data terminals for all services and an automatic vehicle location system for police, the SES and fire services. (The Metropolitan Ambulance Service is already using an automatic vehicle location system.)

Table 9A.31

Table 9A.31 Communications and dispatching systems

-
- (c) Qld: The Premier computer aided dispatch system covers approximately 15 500 square kilometres of urban and rural areas in and around Brisbane. Regional computer aided dispatch systems operate in a range of locations across the State. Some more remote areas receive calls and dispatch locally for the ambulance service.
- (d) Tas: The computer aided dispatch system is routinely upgraded to enhance service delivery by taking advantage of a range of technological innovations.
- (e) ACT: Common computer aided dispatch system.

	Other equipment (h)	5–20 years	3–20 years	3–10 years	5–15 years	5 years	3–10 years	10 years	na
Threshold capitalisation levels (\$)	Buildings	5 000	All	5 000	1 000	10 000	1 000	2 000	na
	IT equipment	5 000	1 000	5 000	1 000	10 000	1 000	na	na
	Other assets	5 000	1 000	5 000	1 000	10 000	1 000	2 000	na

- (a) Market value is the current (net) value market selling price or exchange value; deprival value may be either the depreciated replacement cost of an asset of a similar service potential or the stream of its future economic benefits.
- (b) The assets used by the NSW Rural Fire Service are largely vested in Local Government. Accordingly, although issues such as asset depreciation and useful lives may be guided by Service policies, Local Government policies will prevail in other areas.

Table 9A.36

Table 9A.36 Treatment of assets by emergency management agencies (a), (b), (c)

-
- (c) Estimated as 1/depreciation rate.
 - (d) Asset lives for some assets have been grouped with other classifications.
 - (e) The recognition threshold for the revaluation of assets is \$500 000.
 - (f) Treatment includes all four response agencies: the ACT Fire Brigade, the ACT Rural Fire Service, the ACT State Emergency Service and the ACT Ambulance Service.
 - (g) Services have reported under accrual based accounting from 2002-03. Those items reported are for St John Ambulance Service.
 - (h) For some jurisdictions, office equipment includes furniture and fittings.
 - (i) For some jurisdictions, other equipment includes information technology.
 - na** Not available. .. Not applicable.

(a) Information on emergency management activities was initially collected from the Survey of Emergency Management Activities conducted in 2000. This information was updated by jurisdictions for the 2002-2004 Reports without the survey being reconducted.

Table 9A.37 Summary of emergency management organisations by event type, 2006 (a), (b)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aus Gov
(b) Organisations are ordered by level of involvement in each event type, except for the column under the heading of Australian Government. That is, the first mentioned organisation for each jurisdiction under each event type is the most involved combating organisation, the second mentioned is the second main combating organisation, through to the last mentioned, which is the most minor combating organisation listed (and there may be other organisations with a role, more minor again which are not listed).									
(c) Emergency Management Australia is the central coordinating Australian Government agency for any hazard, at the request of the jurisdictions.									
(d) The Australian Government administrative arrangements referred to in this table reflect the arrangements in place as at 2 December 2007.
