# 14 Aged care services

## CONTENTS

14.1 Profile of aged care services	14.1
14.2 Framework of performance indicators	14.10
14.3 Key performance indicator results	14.12
14.4 Definitions of key terms	14.29
14.5 References	14.31

### **Attachment tables**

Attachment tables are identified in references throughout this chapter by a '14A' prefix (for example, table 14A.1) and are available from the website <https://www.pc.gov.au/research/ongoing/report-on-government-services>.

This chapter reports on government funded care and support services (provided at home and in residential care facilities) for older people (and their carers).

Further information on the Report on Government Services including other reported service areas, the glossary and list of abbreviations is available at <https://www.pc.gov.au/research/ongoing/report-on-government-services>.

## **14.1 Profile of aged care services**

### **Service overview**

As people age they may need care and support to maintain health, social connectedness, wellbeing and the independence to remain in their homes and communities. Forty per cent of older people reported being in need of assistance as they aged (ABS 2016). Much of the care and support for older people is provided by family members, friends or neighbours (ABS 2016). But not everyone's care needs can be fully met through this care and support and 80 per cent of older people will access some form of government funded aged care service before death (AIHW 2015).

---

Government funded aged care services are provided to those who both want them and have been assessed as being in need of them. Services assist people who can no longer live without support to access appropriate care in their home, in the community or in a residential care facility. Approved aged care service providers receive government funding to provide these services and are required to meet minimum standards as well as demonstrate commitment to continuous improvement in quality of care.

## **Roles and responsibilities**

Regulation and policy oversight of aged care services are predominantly the role of the Australian Government. The *Aged Care Act 1997* and the accompanying Aged Care Principles are the main regulatory instruments establishing the framework for aged care services in Australia. Provisions of the Act cover service planning, user rights, eligibility for care, funding, quality assurance and accountability and other matters. There are also a number of independent statutory bodies set up under the Act that have important responsibilities in relation to aged care services: the Aged Care Complaints Commissioner, National Aged Care Advocacy Program, Australian Aged Care Quality Agency (AACQA), and the Aged Care Pricing Commissioner.

State and Territory governments are funded by the Australian Government to provide comprehensive assessment services through the day-to-day operation and administration of Aged Care Assessment Teams (ACAT).<sup>1</sup>

The Australian Government funds residential aged care, home care and home support, with State, Territory and local governments also funding and/or delivering some of these services directly. However, most services are delivered by non-government providers (tables 14A.10–11) such as private-for-profit, religious and charitable organisations.

The Australian Government and State and Territory governments jointly administer/fund the Transition Care and Multi-Purpose Service (MPS) programs. The Australian Government with the WA government fund Home and Community Care (HACC) services (for older and younger clients) in WA.

Government subsidises a significant<sup>2</sup> portion of the cost of providing aged care, but clients and residents are expected to contribute where they can and may be charged fees and payments by service providers.

---

<sup>1</sup> While ACAT undertake comprehensive assessment for services under the Aged Care Act, lower entry-level services needs are assessed by Australian Government funded Regional Assessment Services (RAS). An ACAT is referred to as an Aged Care Assessment Service in Victoria.

<sup>2</sup> In 2015-16, the Commonwealth Government contribution to aged care of \$12.9 billion\* covered approximately 75 per cent of total expenditure in the aged care sector (\*excludes CHSP and HACC contribution of \$2.2 billion) (Aged Care Financing Authority 2017).

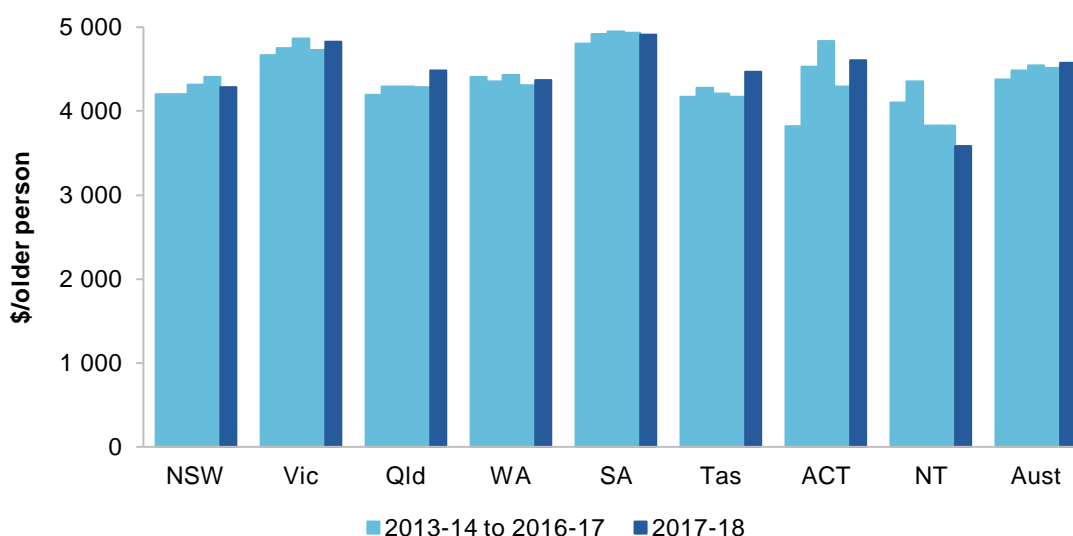

---

## Government expenditure

Government recurrent expenditure on aged care services was \$18.4 billion in 2017-18 or \$4572 per older person (table 14A.4 and figure 14.1).

---

Figure 14.1 **Real recurrent expenditure on aged care services per older person (2017-18 dollars)<sup>a</sup>**

<sup>a</sup> See table 14A.4 for detailed footnotes and caveats.

Source: Department of Health (unpublished); Department of Veterans' Affairs (unpublished); State and Territory governments (unpublished); table 14A.4.

---

Residential aged care services accounted for the largest proportion of expenditure in 2017-18 (\$12.4 billion, or 67.3 per cent). Home care and home support services accounted for much of the remainder (\$5.1 billion) (table 14A.3).

The Australian Government provides around 97 per cent of the government funding for aged care services. State and Territory governments provide the remainder, with the largest contribution being from the WA government (table 14A.3). Further detailed expenditure data by program are contained in tables 14A.3–8.

## Size and scope of sector

### Aged care target population

Demand for aged care services is driven by the size and health of the older population. The Australian population is ageing rapidly, with the proportion of people aged 65 years or over in the total population projected (based on 2016 Census data) to increase from 15 per cent at

---

30 June 2017 to between 21 and 23 per cent in 2066 (ABS 2018a). Although the Aboriginal and Torres Strait Islander population is also ageing, life expectancy at birth for Aboriginal and Torres Strait Islander people is lower when compared with the non-Indigenous population (ABS 2018b). (Population projections for Aboriginal and Torres Strait Islander people based on the 2016 Census are not yet available.)

The aged care target population is defined as all people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years (this aligns with the funding arrangements as specified under the National Health Reform Agreement). This aged care target population differs from the Australian Government’s aged care ‘planning population’ of people aged 70 years or over which is used, along with the population of Aboriginal and Torres Strait Islander Australians aged 50–69 years in some cases, to allocate places under the *Aged Care Act 1997*. See section 14.4 for a definition of the aged care planning population.

## Types of care and support

### *Home care and home support*

Governments provide services to help older people remain, or return to living independently, in their homes. Carers can also access respite care through home care and home support programs:

- the Commonwealth Home Support Program (CHSP) and HACC program<sup>3</sup> provide basic maintenance and support services to people in the community whose independence is at risk — services include centre-based day care, domestic assistance and social support (tables 14A.22–23)
- a limited number of Home Care Packages<sup>4</sup> are available for people requiring higher levels of help to stay at home. There are four levels of care ranging from low level care needs (Home Care Package Level 1) to high care needs (Home Care Package Level 4). Services provided under these packages are tailored to the individual and might include personal care (such as showering), support services (such as cleaning) and/or clinical care (such as nursing and allied health support). As at 30 June 2018, 91 847 people were recipients of Home Care Packages, of which 56.1 per cent received a Home Care Package Level 2 (table 14A.9)
- Department of Veterans’ Affairs (DVA) community care for eligible veterans — Veteran Home Care (VHC) services provide domestic assistance, home and garden maintenance, and respite for people with low care needs; DVA community nursing services provide

---

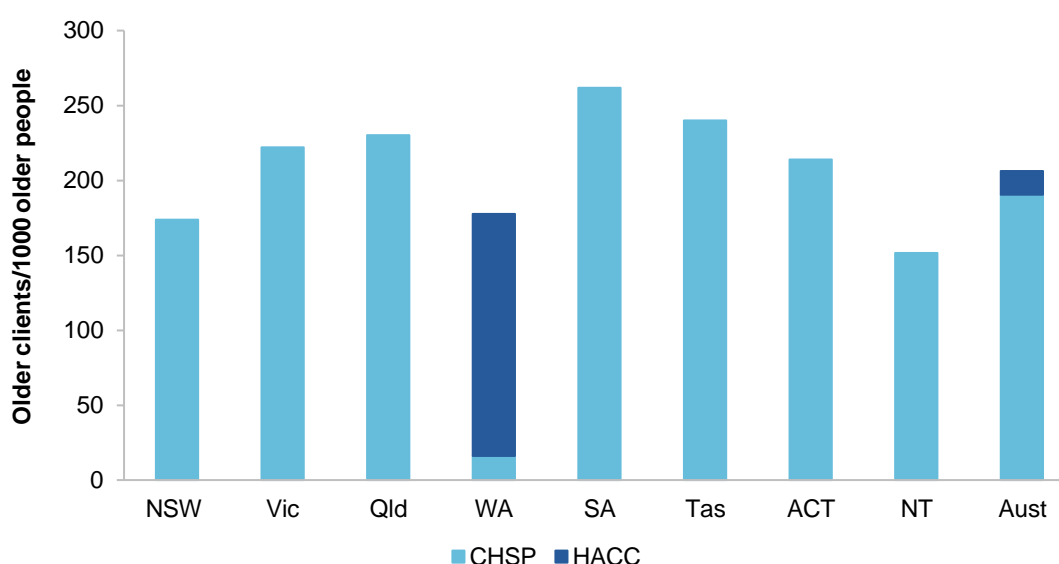

<sup>3</sup> The CHSP now operates fully in all states and territories, except for WA (transition to occur from 1 July 2018) where similar levels of home support to the community are provided through some CHSP services and the HACC program.

<sup>4</sup> From 27 February 2017, Home Care Packages are attached to consumers and allocated according to consumer need (rather than being allocated to providers on the basis of assumed need).

acute/post-acute support and maintenance and palliative care for people with high care needs or disability. In 2017-18, 47 449 older veterans were approved for VHC services and 17 253 older people received community nursing services, representing 36.0 and 13.1 per cent of older eligible veterans respectively (tables 14A.7–8).

In 2017-18, there were 830 272 older clients of home support nationally (CHSP and HACC in WA), equivalent to around 206.4 older clients per 1000 older people (figure 14.2). There were a further 128 582 older clients of Home Care Packages, equivalent to around 32.0 older clients per 1000 older people (table 14A.2).

Figure 14.2 **Older clients of home support (CHSP, HACC) services per 1000 older people, by program, 2017-18<sup>a, b</sup>**

<sup>a</sup> See table 14A.2 for detailed footnotes and caveats. <sup>b</sup> HACC is only applicable in WA.

Source: Department of Health (unpublished); table 14A.2.

### Residential care services

Residential aged care is provided in aged care homes on a permanent or respite basis. Residents receive accommodation, support (cleaning, laundry and meals) and personal care services. Those with greater needs may also receive nursing care, continence aids, basic medical and pharmaceutical supplies and therapy services.

For permanent residents, the Aged Care Funding Instrument (ACFI) is used to appraise dependency and the annual subsidy available through the Australian Government. Residents can be reappraised as their care needs change. Respite residents are not appraised under the ACFI but are classified as high or low care based on their ACAT approval.

The planning framework for services provided under the *Aged Care Act 1997* aims to keep the growth in residential aged care places<sup>5</sup> in line with growth in the older population, and to ensure a balance of services across Australia, including services for people with lower levels of need and in rural and remote areas. Nationally, at 30 June 2018, the number of residential care places was 75.9 per 1000 people in the aged care planning population (i.e., aged 70 years or over) (table 14A.14). If the population of Aboriginal and Torres Strait Islander Australians aged 50–69 years is taken into account, the rate is 74.4 per 1000 older people. This rate is higher in major cities 79.4 compared to regional areas 66.7 and remote/very remote areas 43.0 (tables 14A.15–16).

During 2017-18, 234 798 older people were in permanent care (58.4 per 1000 older people) and 60 278 in respite care (15.0 per 1000 older people) (figure 14.3). At 30 June 2018, the occupancy rate for residential aged care was 90.3 per cent — the lowest rate over the 10 years of reported data (table 14A.13).

**Figure 14.3 Older permanent and respite residential aged care clients per 1000 older people, 2017-18<sup>a</sup>**

<sup>a</sup> See table 14A.2 for detailed footnotes and caveats.

Source: Department of Health (unpublished); table 14A.2.

<sup>5</sup> Up until February 2017, Home care places were also allocated under this framework. Under the Increasing Choices initiative introduced 27 February 2017, Home Care Packages are allocated to consumers rather than providers (consumers then choose a provider). At the same time, short-term restorative care places were introduced and are important in ensuring access to services across geographic locations.

---

### *Flexible care services*

Where mainstream residential or home care services are unable to cater for an older person's specific needs, flexible care options are available:

- Transition Care assists older people in regaining physical and psychosocial functioning following an episode of inpatient hospital care to help maximise independence and avoid premature entry to residential aged care. During 2017-18, there were 24 340 older clients of Transition Care (table 14A.2).
- Short-term restorative care (STRC) is similar to transition care, but is provided to people who have had a setback or decline in function without having been in hospital. In 2017-18, 1574 people aged 65 years or over received STRC services, with 274 people receiving care at 30 June 2018 (Department of Health unpublished).
- The MPS program delivers flexible and integrated health and aged care services to small rural and remote communities. At 30 June 2018, there were 3624 operational MPS program places (Department of Health unpublished).
- The National Aboriginal and Torres Strait Islander Flexible Aged Care Program provides culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to home and their communities and delivers a mix of residential and home care services. At 30 June 2018, there were 860 operational flexible places under this program (Department of Health unpublished).

### Supporting programs

Governments fund 'Workforce and Quality' and 'Ageing and Service improvement' programs to monitor compliance with the accreditation and quality frameworks, and ensure appropriately skilled staff are available to deliver home and residential care services and to address care issues associated with a predicted rise in the prevalence of dementia. Staff providing home and residential care, and the physical environment at residential facilities, are critical to the health, safety and client experience of care and support.

The *Aged Care Act 1997* does not prescribe the qualifications required by staff nor the number of staff required to be employed by an aged care service (Department of Health 2017b), but accreditation standards require aged care providers and residences to employ staff with the right skills and qualifications to look after clients and residents. In 2016, 28.5 per cent of full time equivalent (FTE) direct care staff at aged care homes were either nurses or allied health professionals, down from 31.8 per cent in 2012 (Department of Health 2017a). The physical environment at residential facilities is assessed as part of ongoing accreditation processes by the AACQA (tables 14A.34–37).

---

## Accessing care

### *Information services*

Services such as ‘My Aged Care’ provide older people, their families and carers with information to help them access timely and appropriate care, and find approved aged care services in their local area.

### *Assessment services*

An assessment of need by an ACAT (Aged Care Assessment Service in Victoria), is mandatory for admission to residential care, to receive a Home Care Package, or enter STRC or Transition Care. ACATs also make recommendations regarding the most appropriate long-term care arrangements for clients (table 14A.30). Since 2014, approvals for care from most assessments do not lapse. Assessments for other aged care programs are conducted by other assessment services (for example, Regional Assessment Services (RAS) for CHSP).

Not everyone assessed by an ACAT is approved for care, and some people are approved for more than one type of care. In 2017-18, there were 180 493 completed ACAT assessments (equivalent to 44.9 per 1000 older people) and 234 774 approvals for residential aged care and the Home Care Package program (tables 14A.24-25). ACAT approval rates for Home Care Packages and residential aged care significantly increase with client age (table 14A.25).

### *Elapsed times — time taken from ACAT approval to access care*

The time between an ACAT approval and an older person’s access to an aged care service can be influenced by a range of factors (both service- and person-related) including:

- availability of places/packages and services (which can increase waiting times)
- an older person’s:
  - preference to remain at home for as long as possible, going into approved residential aged care at a later date or not at all (choosing instead to access formal home care, or support from family, friends or the community)
  - need to delay entry into residential aged care due to personal circumstances, such as selling their home
  - decision to reject an offer due to the cost or location.

In 2017-18, 44.7 per cent of older people entered residential aged care within 3 months of their ACAT approval (figure 14.4); the median elapsed time was 121 days, an increase from 105 days in 2016-17 and 84 days in 2015-16 (table 14A.26). Further data on elapsed times are included in tables 14A.26–29.

Figure 14.4 **People entering residential care within specified elapsed time periods of their ACAT approval, 2017-18<sup>a</sup>**

<sup>a</sup> See table 14A.26 for detailed definitions, footnotes and caveats.

Source: Department of Health (unpublished); table 14A.26.

In 2017-18, 42.3 per cent of older people commenced Home Care within 3 months of their ACAT approval under the new Increasing Choice in Home Care arrangements which commenced 27 February 2017 (figure 14.5). Only those approved under the new arrangements are included in the 2017-18 data (accounting for around two-thirds of people commencing Home Care in 2017-18 (Department of Health unpublished)). As approval processes for clients have changed significantly under the new arrangements, reporting has been restricted to this scope for 2017-18.

Figure 14.5 **People commencing Home Care via Increasing Choice in Home Care within one or three months elapsed time of their ACAT approval, 2017-18<sup>a</sup>**

<sup>a</sup> See table 14A.26 for detailed definitions, footnotes and caveats.

Source: Department of Health (unpublished); table 14A.26.

## 14.2 Framework of performance indicators

The framework of performance indicators for aged care services is based on governments' objectives for the aged care sector (box 14.1).

### Box 14.1 Objectives for aged care services

The aged care system aims to promote the wellbeing and independence of older people (and their carers), by enabling them to stay in their own homes or by assisting them in residential care. Governments seek to achieve this aim by subsidising aged care services that are:

- accessible — including timely and affordable
- appropriate to meet the needs of clients — person-centred, with an emphasis on integrated care, ageing in place and restorative approaches
- high quality.

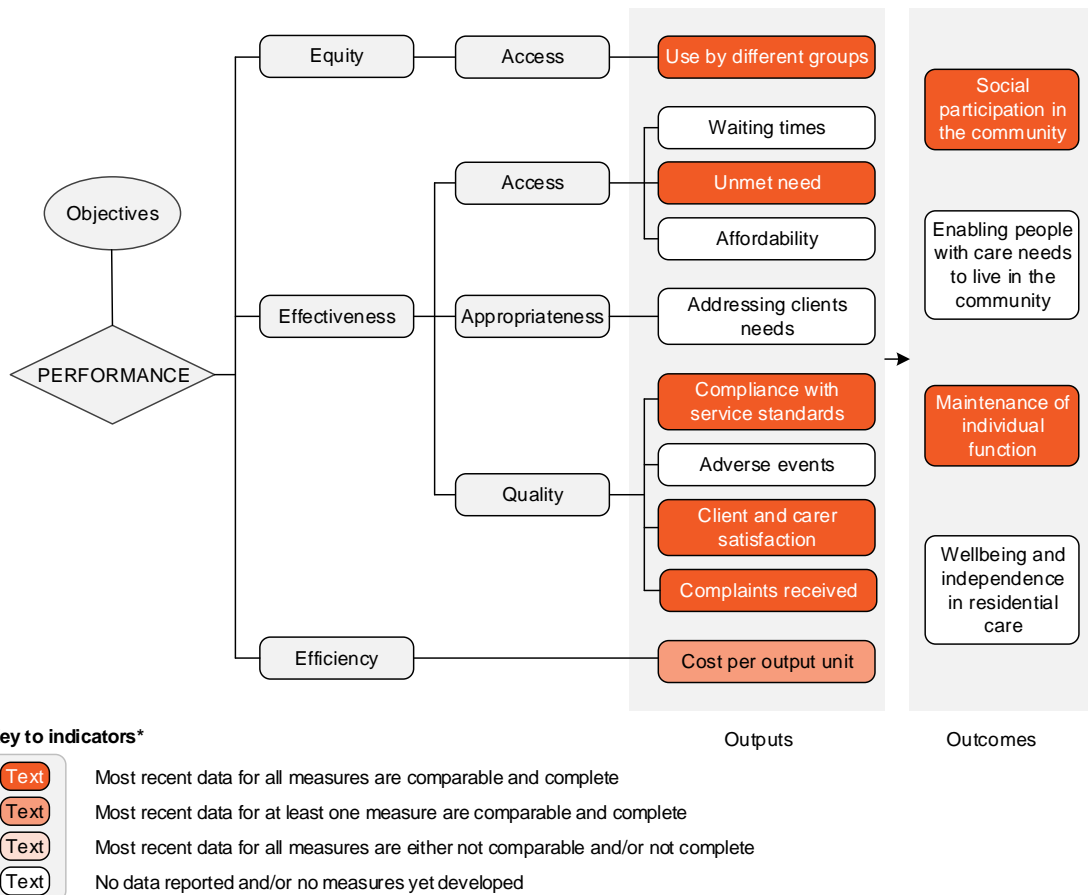

Governments aim for aged care services to meet these objectives in an equitable and efficient manner.

The performance indicator framework provides information on equity, efficiency and effectiveness, and distinguishes the outputs and outcomes of aged care services (figure 14.6).

The performance indicator framework shows which data are complete and comparable in the 2019 Report. For data that are not considered directly comparable, text includes relevant caveats and supporting commentary. Chapter 1 discusses data comparability, data completeness and information on data quality from a Report-wide perspective. In addition to section 14.1, the Report’s statistical context chapter (chapter 2) contains data that may assist in interpreting the performance indicators presented in this chapter. Chapters 1 and 2 are available from the website at <https://www.pc.gov.au/research/ongoing/report-on-government-services>.

Improvements to performance reporting for aged care services are ongoing and include identifying data sources to fill gaps in reporting for performance indicators and measures, and improving the comparability and completeness of data.

Figure 14.6 **Aged care services performance indicator framework**

\* A description of the comparability and completeness of each measure is provided in indicator interpretation boxes within the chapter

---

## 14.3 Key performance indicator results

Different delivery contexts, locations and types of client may affect the effectiveness and efficiency of aged care services.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are either not comparable (subject to caveats) within jurisdictions over time or are not comparable across jurisdictions or both.

The completeness of performance indicator results are shaded in indicator interpretation boxes, figures and chapter and attachment tables as follows:

Data are complete (subject to caveats) for the current reporting period. All required data are available for all jurisdictions

Data are incomplete for the current reporting period. At least some data were not available.

### Outputs

Outputs are the services delivered (while outcomes are the impact of these services on the status of an individual or group) (see chapter 1). Output information is also critical for equitable, efficient and effective management of government services.

### Equity

#### Access – Use by different groups

‘Use by different groups’ is an indicator of governments’ objective to subsidise aged care services in an equitable manner (box 14.2).

---

## Box 14.2 Use by different groups

'Use by different groups' is defined as the proportion of service clients who are from a special needs group, compared with the proportion of the aged care target population who are from that special needs group.

The proportion of service clients from a particular special needs group should be broadly similar to the proportion of the aged care target population who are from that special needs group.

There are nine special needs groups identified by the *Aged Care Act 1997* (see section 14.4 for details). Data are reported for three special needs groups (Aboriginal and Torres Strait Islander Australians; people from Culturally and Linguistically Diverse (CALD) backgrounds; and people receiving aged care services in outer regional, remote/very remote areas. People from CALD backgrounds are defined as those born overseas from countries other than the United Kingdom, Ireland, New Zealand, Canada, South Africa and the United States of America.

Measures for veterans (including widows and widowers of veterans) and for those who are financially and socially disadvantaged are currently under development (although data are available on the proportion of all permanent residents' care days used by financially disadvantaged residents, see table 14A.21). Data are not available for reporting on the remaining special needs groups.

Several factors should be considered when interpreting these data.

- Special needs groups may have greater need for aged care services. Compared to the rest of the population Aboriginal and Torres Strait Islander Australians have higher rates of disability, lower life expectancy and an increased likelihood of requiring aged care services at a younger age. Because of these factors, the target population for Aboriginal and Torres Strait Islander Australians is people aged 50 years or over, compared to 65 years or over for other population groups.
- Cultural differences and the availability of care and support from family, friends or neighbours can also affect the use of services across different population groups. Stronger support networks can reduce the need for government funded aged care services, or for particular government funded service types.

Data reported for this indicator are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2017-18 data are available for all jurisdictions.

Differences in the representation of a special needs group in services compared to their representation in the aged care target population varied across service types and groups. Nationally:

- Aboriginal and Torres Strait Islander Australians are overrepresented for low level Home Care Packages (levels 1–2), similarly represented amongst those accessing CHSP, but are underrepresented in all other service types
- people from CALD backgrounds are overrepresented amongst those accessing both low and high level Home Care Packages, but underrepresented in all other service types

- people receiving aged care services in rural and remote areas are overrepresented amongst those accessing CHSP, but underrepresented in all other service types (table 14.1).

**Table 14.1 Representation of special needs groups in the aged care target population, compared with their representation in older clients of aged care services (per cent)<sup>a</sup>**

Data are comparable (subject to caveats) across jurisdictions.

Data are complete (subject to caveats) for the current reporting period.

## Effectiveness

### Access — Waiting times

‘Waiting times’ is an indicator of governments’ objective to subsidise aged care services that are accessible (box 14.3). The elapsed time between approval for care and commencement of care is reported earlier in the chapter as context.

#### Box 14.3 Waiting times

‘Waiting times’ is defined as the proportion of older people who have an ACAT approval and are ready to take up care, who are able to enter residential care or commence Home Care within three months.

Higher proportions of admission to residential care or commencement of Home Care within three months are desirable.

Data for this indicator are not available.

### Access – Unmet need

‘Unmet need’ is an indicator of governments’ objective of subsidising aged care services that are accessible (box 14.4).

---

## Box 14.4 Unmet need

'Unmet need' measures the need for aged care services relative to the access to services. Two measures of unmet need (one is a proxy) are reported.

### *Unmet need in the community*

The 'Unmet need in the community' measure is the proportion of older people (aged 65 years or over) who were living in households and reported being in need of assistance, that also reported that their need was not fully met.

A low or decreasing proportion of people reporting their need as not fully met is desirable.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions (only one year of data are reported)
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

### *Hospital patient days used by aged care type patients*

The 'Hospital patient days used by aged care type patients' is a *proxy* measure of unmet need defined as the proportion of hospital patient days (for overnight separations only) that were for aged care type patients (see section 14.4 for further details).

Hospital inpatient services are geared towards shorter periods of acute care aimed at addressing serious illness or injury, or diagnosis. The needs of older people for maintenance care (particularly for extended periods of time) can be better met in residential aged care services than hospitals.

A low or decreasing proportion of patient days used by aged care type patients is desirable.

The data should be interpreted with caution, because:

- days for patients who have not completed their period of care in a hospital are not included
- identification in hospital as aged care patient type may not reflect a person's eligibility for residential care services (this is determined by an ACAT assessment) or reliably reflect access issues for residential aged care from the acute care sector — data (utilising appropriate linked hospital separations and ACAT approvals) are not available at this time
- the diagnosis codes for aged care patient type may not be applied consistently across jurisdictions or over time
- the denominator (all patient days for overnight separations) does not directly reflect the need for aged care services.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions and over time.
- complete (subject to caveats) for the current reporting period. All required 2016-17 data are available for all jurisdictions.

### *Unmet need in the community*

Nationally in 2015, 30.8 per cent of older people who were living in households and in need of assistance, reported that their need was not fully met (table 14A.31). The proportion was

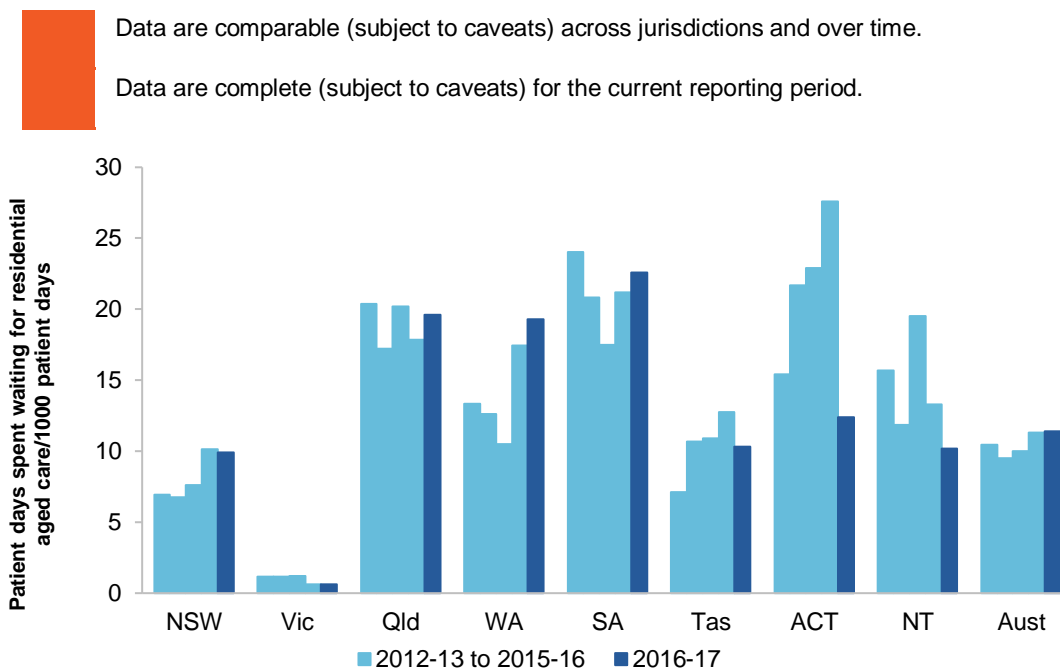

higher for those with a profound or severe disability (37.4 per cent) than for those without a disability (20.8 per cent).

### *Hospital patient days used by aged care type patients*

Understanding the relationship between the aged care and health systems is of particular importance as interactions are critical for the performance of both systems. The number of operational residential aged care places can affect demand for public hospital beds, just as the number of older patients in acute and subacute care and the time they spend in hospital can affect demand for aged care services.

Nationally in 2016-17, the proportion of all hospital patient days used by patients waiting for residential aged care was 11.4 per 1000 patient days (figure 14.7). Proportions were lower for Aboriginal and Torres Strait Islander people compared to other Australians, but higher for people from low socioeconomic areas compared to those from higher socioeconomic areas (table 14A.33). The proportion of separations for ‘aged care type’ patients<sup>6</sup> waiting 35 days or longer was 11.2 per cent nationally in 2016-17 (table 14A.32).

**Figure 14.7 Hospital patient days used by patients waiting for residential aged care<sup>a</sup>**

<sup>a</sup> See box 14.4 and table 14A.33 for detailed definitions, footnotes and caveats.

Source: Australian Institute of Health and Welfare (unpublished); table 14A.33.

<sup>6</sup> Scope of these aged care type patients is slightly different to that defined for the indicator. See table 14A.32 for details.

---

## Access – Affordability

‘Affordability’ is an indicator of governments’ objective to subsidise aged care services to make them affordable for those that need them (box 14.5).

### **Box 14.5      Affordability**

‘Affordability’ is defined as the out-of-pocket costs for aged care services (after subsidies) as a proportion of disposable income.

Low or decreasing out-of-pocket cost for aged care services as a proportion of disposable income represents more affordable aged care services and is desirable.

Data are not yet available for reporting against this indicator.

## Appropriateness – Addressing client needs

‘Addressing client needs’ is an indicator of governments’ objective to subsidise aged care services that are appropriate to meet the needs of clients — person-centred, with an emphasis on integrated care, ageing in place and restorative approaches (box 14.6).

### **Box 14.6      Addressing client needs**

‘Addressing client needs’ will measure the extent to which:

- care recipients or their representatives had input into the planning of their care
- the supports identified in the care planning process to address an individual’s needs were provided (match of needs)
- individual interests, customs, beliefs and cultural and ethnic backgrounds were valued and fostered.

Data are not yet available for reporting against this indicator.

## Quality – Compliance with service standards

‘Compliance with service standards’ is an indicator of governments’ objective to subsidise high quality aged care services (box 14.7).

---

## Box 14.7 Compliance with service standards

'Compliance with service standards' measures the extent to which approved aged care services are meeting expected standards. Measures are reported for residential care, and home care and home support.

### *Residential care*

For residential aged care, the measure is the proportion of re-accredited facilities given three-year accreditation. Three years is the longest period for which re-accreditation can be granted (in most cases), so if a service is re-accredited for this period it implies a higher level of service quality than for those re-accredited for a shorter period. Further information on the accreditation standards and process is available at [www.aacqa.gov.au](http://www.aacqa.gov.au).

Data for this measure do not include 35 new facilities (1.3 per cent of all residential care facilities) that have not been re-accredited as at 30 June 2018.

High or increasing proportions of services that are re-accredited for three years is desirable.

Data reported for this indicator are:

- comparable (subject to caveats) across jurisdictions (only one year of data are reported)
- complete (subject to caveats) for the current reporting period. All required June 2018 data are available for all jurisdictions.

### *Home care and home support*

For Home care and support, the measure is the proportion of reviews that met all expected outcomes under each of the three Home Care Common Standards.

- Standard 1 — Effective management
- Standard 2 — Appropriate access and service delivery
- Standard 3 — Service user rights and responsibilities.

Data are reported for Australian Government Home care and support service providers combined, and separately for the WA HACC program.

High or increasing proportions of services that met all expected outcomes is desirable.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions for Australian Government home care and support providers, and over time for WA HACC services
- complete (subject to caveats) for the current reporting period. All required 2017-18 data are available for all jurisdictions.

As at 30 June 2018, 96.9 per cent of the 2669 re-accredited residential aged care services had been given three year accreditation (table 14A.37). During 2017-18, 93.1 per cent of the 1561 services re-accredited were given three year accreditation status (table 14A.34), with disaggregations by remoteness and size of facility in tables 14A.35-36.

For Australian Government home care and home support services, 24.5 per cent of the reviews scheduled to be done over the period 2017 to 2020 had been completed by 30 June 2018 (table 14A.39).

The proportions of home care and home support service providers reviewed during 2017-18 that achieved all expected outcomes for each of the three standards are in table 14.2. Results for WA HACC services were similar (table 14A.40).

**Table 14.2 Australian Government home care and home support service providers that achieved all relevant expected outcomes, 2017-18 (per cent)<sup>a</sup>**

Data are comparable (subject to caveats) across jurisdictions.

Data are complete (subject to caveats) for the current reporting period.

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Standard 1	95.5	96.3	92.2	91.7	79.3	92.0	84.6	81.8	92.3
Standard 2	95.5	96.9	97.7	100.0	82.8	92.0	92.3	81.8	94.5
Standard 3	99.1	99.0	96.9	100.0	93.1	100.0	100.0	81.8	97.3

<sup>a</sup> See box 14.7 and table 14A.39 for detailed definitions, footnotes and caveats.

Source: Australian Aged Care Quality Agency (unpublished); table 14A.39.

## Quality – Adverse events

‘Adverse events’ is an indicator of governments’ objective to subsidise high quality aged care services (14.8).

### Box 14.8 Adverse events

‘Adverse events’ is defined as the number of adverse events that occur in the provision of aged care services expressed as a rate. No appropriate direct measure of adverse events in aged care is available; two potential measures have been identified for this indicator.

Low or decreasing rates of adverse events is desirable.

#### *Adverse events in residential aged care*

The National Aged Care Quality Indicator Program (NQIP) was piloted in 2015 and 2016 to report on pressure injuries, use of physical restraint and unplanned weight loss as indicators for residential facilities. The voluntary program was implemented in 2016. In October 2017 the Review of National Aged Care Quality Regulatory Processes recommended that all residential care services participate in the scheme. As NQIP data mature they may be suitable to report here, subject to developments following the Royal Commission into Aged Care Quality and Safety.

Data are not available for reporting against this measure.

(continued next page)

---

Box 14.8 (continued)

*Hospital leave days from residential aged care for preventable causes*

'Hospital leave days from residential aged care for preventable causes' is being investigated as a proxy measure and would indicate the days that were spent out-of-residence due to preventable causes.

Data are not available for reporting against this measure.

---

## Quality – Client and carer satisfaction

'Client and carer satisfaction' is an indicator of government's objective to subsidise high quality aged care services (box 14.9).

---

Box 14.9 **Client and carer satisfaction**

'Client and carer satisfaction' is defined by four measures:

- the proportion of people aged 65 years or over living in households, who are satisfied with the *range* of organised and formal service options available
- the proportion of people aged 65 years or over living in households, who are satisfied with the *quality* of assistance received from organised and formal services in the last six months
- the proportion of primary carers living in households (caring for people aged 65 years or over), who are satisfied with the *range* of formal service options available to help them in their caring role
- the proportion of primary carers living in households (caring for people aged 65 years or over), who are satisfied with the *quality* of assistance received from formal services in the last six months to help them in their caring role.

A high or increasing proportion of clients and carers who are satisfied is desirable as it suggests that the service received was of a higher quality.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Comparability of the NT results against other jurisdictions for this indicator are affected by the scope of the Survey of Disability Ageing and Carers (SDAC) as it does not include people living in discrete Aboriginal and Torres Strait Islander communities or very remote areas.

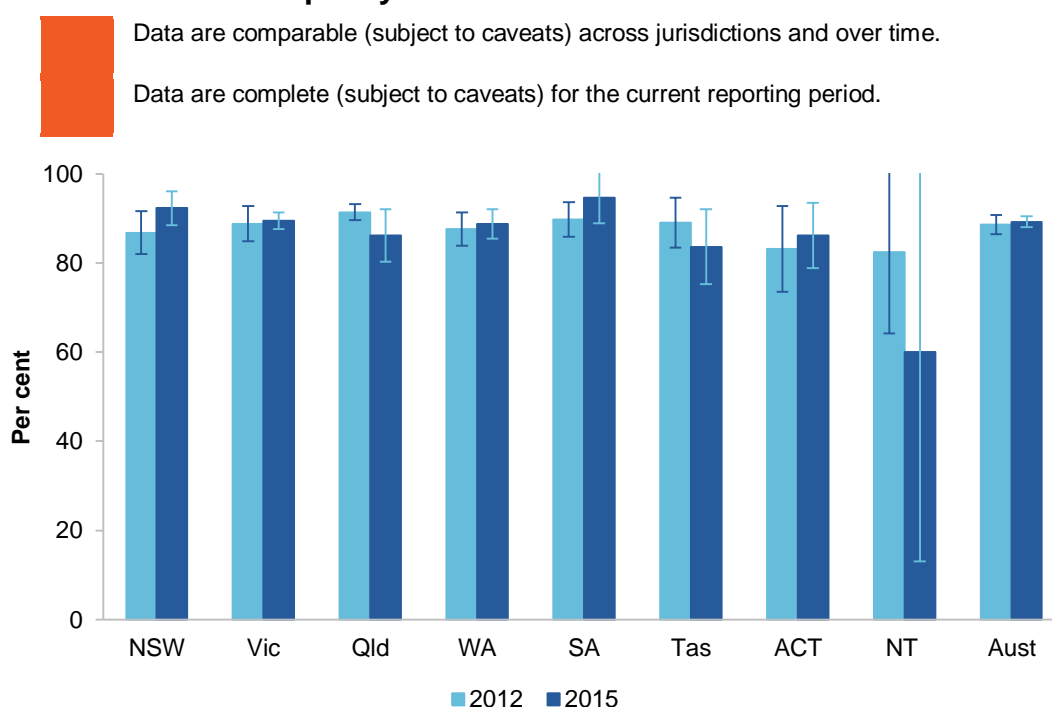

---

Nationally in 2015, around three-quarters (76.1 per cent) of people aged 65 years or over who reported a need for, or received formal services in the previous six months, were satisfied with the *range* of services available (table 14A.42). Of people aged 65 years or over who received formal services in the previous six months, 89.2 per cent were satisfied with the *quality* of assistance they received (figure 14.8) – similar to 2012.

For primary carers of people aged 65 years or over, the proportion who were satisfied with the quality of services received to help them in their caring role was 77.2 per cent in 2015 compared to 84.7 per cent in 2012 (table 14A.43). Just under half (47.2 per cent) of primary carers were satisfied with the range of organised services available to help them in their caring role (table 14A.44) – similar to 2012.

Data disaggregated by remoteness area are available in tables 14A.45–48.

**Figure 14.8 Proportion of people aged 65 years or over who are satisfied with the quality of services received<sup>a</sup>**

<sup>a</sup> See box 14.9 and table 14A.41 for detailed definitions, footnotes and caveats.

Source: ABS (unpublished) SDAC; table 14A.41.

### Quality – Complaints received

‘Complaints received’ is an indicator of governments’ objective to subsidise high quality aged care services (box 14.10).

---

### Box 14.10 **Complaints received**

‘Complaints received’ is defined as the number of in-scope complaints received for residential aged care services per 1000 residential aged care residents (permanent and respite). Complaints within scope relate to Australian Government funded providers of residential care, Home Care, CHSP or flexible aged care services.

All else being equal, a low or decreasing rate of complaints can suggest higher quality residential care services. However, a high or increasing rate of complaints may not necessarily mean lower quality services as it may reflect more effective complaints reporting and monitoring arrangements.

Further information on the operation of the Complaints Commissioner is available at [www.agedcarecomplaints.gov.au](http://www.agedcarecomplaints.gov.au).

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2017-18 data are available for all jurisdictions.

During 2017-18, a total of 5779 in-scope complaints were received. Nationally, 4315 complaints were for residential care services (permanent and respite), which equated to 23.1 complaints per 1000 residential care residents (table 14A.38).

## Efficiency

### Cost per output unit

‘Cost per output unit’ is an indicator of governments’ objective to subsidise aged care services in an efficient manner (box 14.11).

---

### Box 14.11 **Cost per output unit**

‘Cost per output unit’ is defined by two measures:

- Australian Government expenditure per ACAT assessment — Australian Government expenditure on the Aged Care Assessment Program divided by the number of completed assessments
- expenditure per hour of service for CHSP/HACC — Australian and WA governments expenditure on services, divided by the number of hours of service provided.

While high or increasing cost per output unit may reflect deteriorating efficiency, it may also reflect changes in aspects of the service (such as greater time spent with clients) or differences in the characteristics of clients (such as their geographic location). Similarly, while low or declining cost per output unit may reflect improving efficiency it may also reflect declining quality (such as less time spent with clients).

(continued next page)

---

**Box 14.11** (continued)

Not all expenditure is included in these measures. Expenditure by local governments and non-government sources on services (for example, client fees for CHSP/HACC) and State and Territory governments' contributions to the cost of ACAT assessments are not included.

Data reported for the 'Australian Government expenditure per ACAT assessment' measure are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2017-18 data are available for all jurisdictions.

Data reported for the 'expenditure per hour of service for CHSP/HACC' measure are:

- not comparable across jurisdictions, but are comparable (subject to caveats) within jurisdictions over time
- complete (subject to caveats) for the current reporting period. All required 2017-18 data were provided for all jurisdictions.

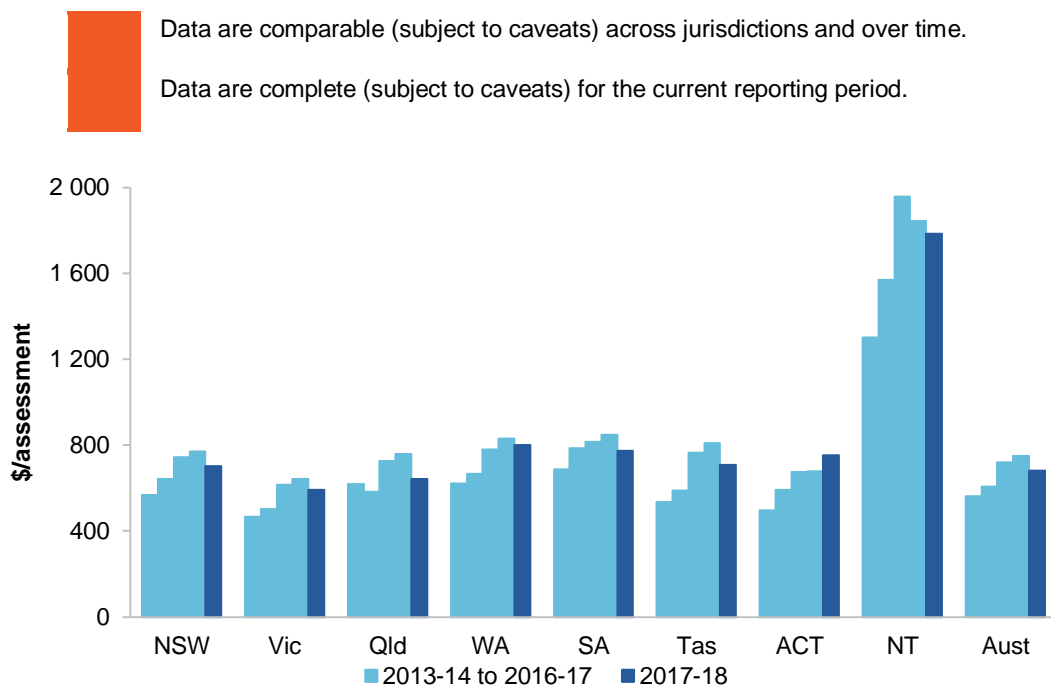

Efficiency (cost per unit) measures for residential care and home care are under development.

Nationally, the average Australian Government expenditure per ACAT assessment during 2017-18 was \$681 (figure 14.9).

In 2017-18, Australian and WA governments' expenditure on CHSP and HACC services per hour was higher for nursing and allied health than for domestic assistance and personal care (table 14A.50).

Figure 14.9 **Australian Government expenditure on aged care assessments, per assessment (2017-18 dollars)<sup>a</sup>**

<sup>a</sup> See box 14.11 and table 14A.49 for detailed definitions, footnotes and caveats.

Source: Department of Health (unpublished); table 14A.49.

## Outcomes

Outcomes are the impact of services on the status of an individual or group (see chapter 1).

### Social participation in the community

‘Social participation in the community’ is an indicator of governments’ objective to encourage the wellbeing and independence of older people (box 14.12).

#### Box 14.12 **Social participation in the community**

‘Social participation in the community’ is indicative of the wellbeing and independence of older people as defined by three measures, the estimated proportions of older people (aged 65 years or over) who:

- participated in social or community activities away from home in the last three months
- had face-to-face contact with family or friends not living in the same household in the last week
- did not leave home or did not leave home as often as they would like.

(continued next page)

---

### Box 14.12 (continued)

These measures are reported by disability status (profound or severe disability, other disability, all disability, without disability) and for all older people. Disability status is used as a *proxy* to identify older people who might need more assistance to support their social participation.

High or increasing proportions of social participation in the community are desirable.

Data reported for these measures are:

- comparable (subject to caveats) across jurisdictions (only one year of data is reported)
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Comparability of the NT results for this indicator are affected by the Survey of Disability Ageing and Carers (SDAC) survey instrument as it does not include data for people living in discrete Aboriginal and Torres Strait Islander communities and very remote areas.

Nationally in 2015:

- 93.6 per cent of older people reported having participated in social or community activities away from home in the last three months; the proportion was lower for older people with profound or severe disability (82.9 per cent) compared to those without disability (95.9 per cent) (table 14A.51)
- 77.4 per cent of older people reported having face-to-face contact with family or friends that were not living in the same household in the last week; the proportion was lower for older people with profound or severe disability (74.5 per cent) compared to those without disability (78.4 per cent) (table 14A.52)
- 14.5 per cent of older people reported they did not leave home or did not leave home as often as they would like; the proportion was higher for older people with profound or severe disability (45.6 per cent) compared to those without disability (6.5 per cent) (table 14A.53).

### Enabling people with care needs to live in the community

‘Enabling people with care needs to live in the community’ is an indicator of governments’ objective to promote the wellbeing and independence of older people, by enabling them to stay in their own homes (box 14.13).

---

### Box 14.13 **Enabling people with care needs to live in the community**

Enabling people with care needs to live in the community' is defined as proportion of older people with care needs who are living in the community.

An increasing proportion of older people with care needs who are living in the community is desirable, where the older person wants to and their health and wellbeing are not compromised. This indicator should be considered alongside the outcome indicator on social participation.

Data are not yet available for reporting against this indicator.

### Maintenance of individual function

'Maintenance of individual function' is an indicator of governments' objective for aged care services to promote the wellbeing and independence of older people (box 14.14).

---

### Box 14.14 **Maintenance of individual function**

'Maintenance of individual function' is defined as the improvement in the level of physical function for Transition Care Program (TCP) clients from entry to exit, measured as the difference between the average Modified Barthel Index (MBI) score on TCP entry and exit.

An increase in the score from entry to exit is desirable.

The MBI is a measure of functioning ranging from 0 (fully dependent) to 100 (fully independent). Data are reported for recipients who completed a TCP episode only. See section 14.4 for details on the TCP.

This indicator needs to be interpreted with caution. The TCP operates with some differences across jurisdictions including differences in health and aged care service systems, local operating procedures and client groups. Variation in the average MBI scores on entry and exit from the program may reflect differences in client groups for the program across jurisdictions.

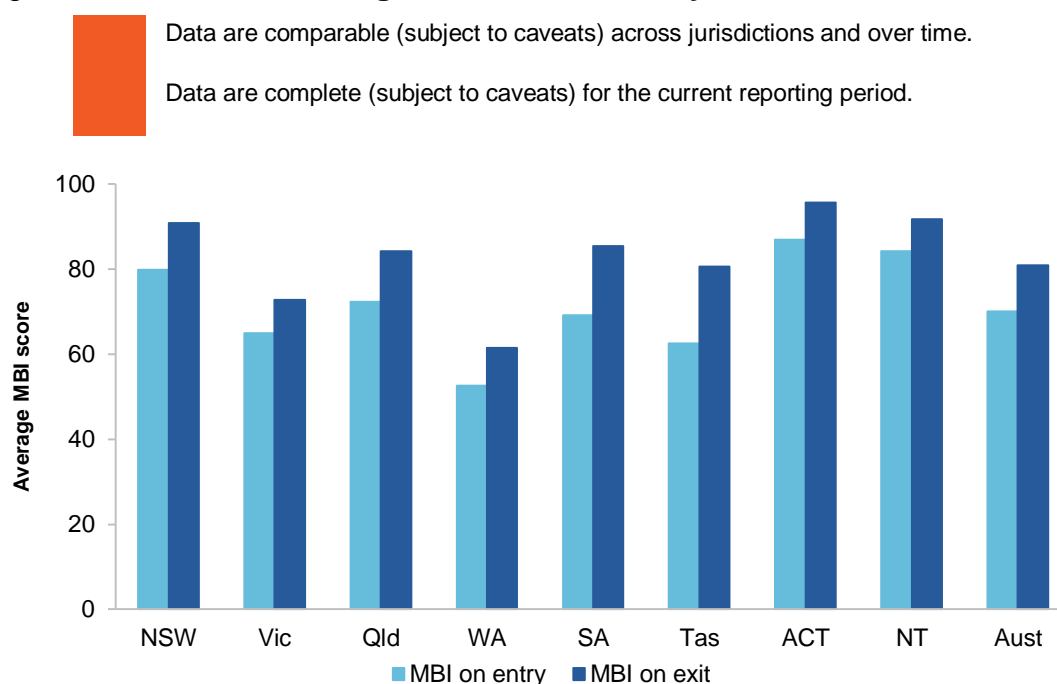

The TCP is a small program only available directly upon discharge from hospital (in 2017-18 there were 24 778 admissions to TCP (table 14A.54). The average duration of care is around 8.5 weeks, with a maximum duration of 12 weeks (may be extended by a further 6 weeks in some circumstances).

Data reported for this indicator are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2017-18 data are available for all jurisdictions.

Nationally in 2017-18, the average MBI score for TCP clients improved from entry (70) to exit (81) (figure 14.10) – similar to scores over the last 10 years. At the jurisdictional level there is greater variability (table 14A.54).

Figure 14.10 TCP — average MBI score on entry and exit, 2017-18<sup>a</sup>

<sup>a</sup> See box 14.14 and table 14A.54 for detailed definitions, footnotes and caveats.

Source: Department of Health (unpublished); table 14A.54.

## Wellbeing and independence in residential care

‘Wellbeing and independence in residential care’ is an indicator of governments’ objective to promote the wellbeing and independence of older people, by assisting them in residential care (box 14.15).

### Box 14.15 Wellbeing and independence in residential care

‘Wellbeing and independence in residential care’ is defined as the proportion of older people in residential aged care assessed as having a high quality of life. Quality of life is the degree to which an individual resident’s wellbeing meets their personal expectations and those of their carers.

A high or increasing proportion of older people in residential aged care with high quality of life is desirable.

Data are not yet available for reporting against this indicator.

---

## 14.4 Definitions of key terms

<b>Accreditation</b>	<p>Accreditation is a key component of the Australian Government’s quality framework for federally funded residential aged care and is a quality assurance system for residential aged care services — based on the principle of continuous improvement.</p> <p>Accreditation requires assessment against the 44 expected outcomes used for accreditation assessment — grouped into four standards: management systems, staffing and organisational development; health and personal care; residential lifestyle; and physical environment and safety systems.</p>
<b>Aged care</b>	<p>Services funded and/or provided by governments that respond to the functional and social needs of older people, and the needs of their carers. Home care and home support services aim to optimise independence and to assist older people to stay in their own homes, while residential care services provide accommodation and care for those who can no longer be cared for at home. Assessment of care needs is an important component of aged care.</p> <p>The majority of aged care services assist in activities of daily living such as personal care (for example, bathing and dressing), housekeeping and meal provision. Other services aim to promote social participation and connectedness. These services are delivered by trained aged care workers and volunteers. However, aged care services may also be delivered by health professionals such as nurses and occupational therapists.</p> <p>Aged care services generally aim to promote wellbeing and foster function rather than to treat illness. Although some aged care services such as transition care have a specific restorative role, they are distinguished from the health services described in Part E of this Report. Aged care services may be funded through programs specifically or mainly directed to older people, or through programs that address the needs of people of different ages.</p>
<b>Aged care target population</b>	<p>The Aged Care target population is defined as all people (Aboriginal and Torres Strait Islander and non-Indigenous) aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years. This is the population within the scope of, and funded for services under, the national aged care system (except in WA).</p>
<b>Aged care type patient (unmet need indicator)</b>	<p>Aged care type patients are those who are waiting for residential aged care where the care type is <i>Maintenance</i>, a diagnosis was reported as <i>Person awaiting admission to residential aged care service</i> and the separation mode was not <i>Other (includes discharge to place of usual residence)</i>. Includes overnight separations only.</p>
<b>Aged care planning population</b>	<p>The Aged care planning population is defined as people aged 70 years or over. This is the population used by the Australian Government for its needs-based planning framework to ensure sufficient supply of both places by matching the growth in the number of aged care places with growth in the aged population. It also seeks to ensure balance in the provision of services between metropolitan, regional, rural and remote areas, as well as between people needing differing levels of care.</p> <p>Under the framework, the Australian Government seeks to achieve and maintain a specified national provision level of subsidised operational aged care places for every 1000 people aged 70 years or over. This provision level is known as the aged care provision ratio (DoHA 2012).</p>
<b>Ageing in place in residential care</b>	<p>An approach that aims to provide residents with appropriate care and increased choice by allowing them to remain in the same facility regardless of changes in their level of care needs. It also allows couples with different levels of care needs to be cared for in the same facility. The main facet of ‘ageing in place’ is that funding is tied to the assessed care needs of the client rather than to the services provided by the facility.</p>
<b>Capital expenditure on residential services</b>	<p>Expenditure on building and other capital items, specifically for the provision of Australian Government funded residential aged care.</p>

---

<b>Care leaver</b>	A care leaver is a person who was in institutional care (such as an orphanage or mental health facility) or other form of out-of-home care, including foster care, as a child or youth (or both) at some time during their lifetime (DoHA 2012).
<b>Centre day care</b>	Respite care provided from a facility such as a day care or health centre. Respite care is usually combined with social support services to maintain the functional capabilities of the person receiving care.
<b>Complaint</b>	A complaint by the affected care recipient or his or her representative, or anyone else, to the Complaints Commissioner about matters relevant to an approved provider's responsibilities under the <i>Aged Care Act 1997</i> or the Aged Care Principles.
<b>Disability</b>	In the ABS SDAC 2015, a person has a disability if they report they have a limitation, restriction or impairment, which has lasted, or is likely to last, for at least six months and restricts everyday activities. This includes: loss of sight (not corrected by glasses or contact lenses); loss of hearing where communication is restricted, or an aid to assist with, or substitute for, hearing is used; speech difficulties; shortness of breath or breathing difficulties causing restriction; chronic or recurrent pain or discomfort causing restriction; blackouts, seizures, or loss of consciousness; difficulty learning or understanding; incomplete use of arms or fingers; difficulty gripping or holding things; incomplete use of feet or legs; nervous or emotional condition causing restriction; restriction in physical activities or in doing physical work; disfigurement or deformity; mental illness or condition requiring help or supervision; long term effects of head injury, stroke or other brain damage causing restriction; receiving treatment or medication for any other long term conditions or ailments and still being restricted and any other long term conditions resulting in a restriction.
<b>Elapsed time</b>	The measure of the time elapsed between an ACAT approval and entry into a residential care service or commencement of Home Care.
<b>Home Care Common Standards</b>	<p>Standard 1 — Effective management — the service provider demonstrates effective management processes based on a continuous improvement approach to service management, planning and delivery.</p> <p>Standard 2 — Appropriate access and service delivery — each service user (and prospective service user) has access to services, and service users receive appropriate services that are planned, delivered and evaluated in partnership with themselves and/or their representatives.</p> <p>Standard 3 — Service user rights and responsibilities — each service user (and/or their representative) is provided with information to assist them to make service choices and has the right (and responsibility) to be consulted and respected. Service users (and/or their representative) have access to complaints and advocacy information and processes and their privacy and confidentiality and right to independence is respected.</p>
<b>People from non-English speaking countries</b>	People who were born in non-English speaking countries. English-speaking countries are defined as Australia, New Zealand, the United Kingdom, Ireland, the United States, Canada and South Africa.
<b>People with profound, severe and moderate disability</b>	<p>A person with a profound disability is unable to do, or always needs help with, a core activity task.</p> <p>A person with a severe disability: sometimes needs help with a core activity task, and/or has difficulty understanding or being understood by family or friends, or can communicate more easily using sign language or other non-spoken forms of communication.</p> <p>A person with a moderate disability needs no help, but has difficulty with a core activity task.</p>
<b>Older people</b>	All people (Aboriginal and Torres Strait Islander and non-Indigenous) aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years.
<b>Personal care</b>	Assistance in undertaking personal tasks (for example, bathing).

---

<b>Places</b>	A capacity within an aged care service for the provision of residential care, community care or flexible care in the residential care context to an individual ( <i>Aged Care Act 1997 (Cwlth)</i> ); also refers to 'beds' ( <i>Aged Care (Consequential Provisions) Act 1997 (Cwlth)</i> , s.16).
<b>Primary carer</b>	<p>In the ABS SDAC, a primary carer is defined as a person who provides the most informal assistance, in terms of help or supervision, to a person with disability with one or more of the core activities of mobility, self care or communication. The assistance has to be ongoing, or likely to be ongoing, for at least six months.</p> <p>Where the primary carer has more than one recipient of care, the main recipient of care is the one receiving the most help or supervision. A sole recipient is also classed as a main recipient.</p> <p>Where the care recipient lives in the same household, the assistance is for one or more of the following core and non-core activities (cognition/emotion, communication, health care, household chores, meal preparation, mobility, property maintenance, reading or writing, self care, transport (ABS 2016).</p>
<b>Respite care</b>	Alternative care arrangements for dependent people living in the community, with the primary purpose of giving a carer or a care recipient a short term break from their usual care arrangement.
<b>Special needs groups</b>	Section 11-3 of the <i>Aged Care Act 1997</i> , specifies the following people as people with special needs: people from Aboriginal and Torres Strait Islander communities; people from culturally and linguistically diverse backgrounds; veterans; people who live in rural or remote areas; people who are financially or socially disadvantaged; people who are homeless or at risk of becoming homeless; care-leavers; parents separated from their children by forced adoption or removal; and lesbian, gay, bisexual, transgender and intersex people.
<b>Veterans</b>	Veterans, war widows, widowers and dependants who hold a Repatriation Health Card and are entitled to health services and treatment under the <i>Veterans' Entitlements Act 1986 (VEA)</i> , <i>Safety, Rehabilitation and Compensation Act 1988 (SRCA)</i> or the <i>Military Rehabilitation and Compensation Act 2004 (MRCA)</i> .

# 14A Aged care services — attachment

Definitions for the indicators and descriptors in this attachment are in section 14.4 of the chapter. Unsourced information was obtained from the Australian, State and Territory governments. Information on the comparability and completeness of the data for the performance indicators and measures is in sections 14.2-3

Data in this Report are examined by the Disability and Aged Care Services Working Group, but have not been formally audited by the Secretariat.

Data reported in the attachment tables are the most accurate available at the time of data collection. Historical data may have been updated since the last edition of RoGS.

This file is available on the Review website at <https://www.pc.gov.au/research/ongoing/report-on-government-services>

## Attachment contents

<b>Table 14A.1</b>	Aged care target and planning populations, by remoteness areas ('000)
<b>Table 14A.2</b>	People receiving aged care services, 2017-18
<b>Table 14A.3</b>	Government expenditure on aged care services, 2017-18 (\$ million)
<b>Table 14A.4</b>	Government real expenditure on aged care services, by program type (2017-18 dollars)
<b>Table 14A.5</b>	Real expenditure on aged care services (2017-18 \$million)
<b>Table 14A.6</b>	Real capital expenditure on aged care services (2017-18 \$million)
<b>Table 14A.7</b>	Australian Government (DVA) Veterans' Home Care (VHC) and Community Nursing programs, 2017-18
<b>Table 14A.8</b>	Australian Government (DVA) residential aged care (summary information)
<b>Table 14A.9</b>	Number of Home Care Packages places or recipients, by package level
<b>Table 14A.10</b>	Ownership of operational residential aged care places
<b>Table 14A.11</b>	Number of Home Care Packages places or recipients, by ownership status of providers
<b>Table 14A.12</b>	Average annual Australian Government basic subsidy amount, including Conditional Adjustment Payment, per occupied place and the dependency level of aged care residents
<b>Table 14A.13</b>	Operational places, occupancy rates and size and distribution of residential aged care services
<b>Table 14A.14</b>	Operational number of aged care places per 1000 people aged 70 years or over, 30 June
<b>Table 14A.15</b>	Operational number of residential and transitional aged care places per 1000 people aged 70 years or over and Aboriginal and Torres Strait Islander Australians aged 50–69 years, 30 June
<b>Table 14A.16</b>	Residential and community aged care places/recipients per 1000 population, by remoteness, 30 June 2018
<b>Table 14A.17</b>	Representation of older people from Culturally and Linguistically Diverse (CALD) backgrounds in the aged care target population and in aged care recipients (per cent)
<b>Table 14A.18</b>	Representation of Aboriginal and Torres Strait Islander Australians in the aged care target population and in older aged care recipients (per cent)
<b>Table 14A.19</b>	Representation of older people receiving services from providers located in rural and remote areas in the aged care target population and in aged care recipients (per cent)
<b>Table 14A.20</b>	Aged care recipients at 30 June 2018 by program: age-sex specific usage rates per 1000 people
<b>Table 14A.21</b>	Proportion of permanent new residents or all resident care days classified as concessional, assisted, supported or low means (per cent)
<b>Table 14A.22</b>	HACC services received per 1000 people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years
<b>Table 14A.23</b>	CHSP services received per 1000 people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years, 2017-18
<b>Table 14A.24</b>	Aged care assessments
<b>Table 14A.25</b>	Age-specific rates for ACAT approvals of eligibility, by age (no. per 1000 people)
<b>Table 14A.26</b>	Elapsed time between ACAT approval and entry into aged care services
<b>Table 14A.27</b>	Elapsed times for residential aged care, by remoteness, 2017-18
<b>Table 14A.28</b>	Elapsed times for residential aged care, by Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) quintiles, 2017-18
<b>Table 14A.29</b>	Elapsed times for residential aged care, by Indigenous status, 2017-18
<b>Table 14A.30</b>	Recommended location of longer term living arrangements of Aged Care Assessment Program clients
<b>Table 14A.31</b>	Older people needing assistance with at least one everyday activity: extent to which need was met, by disability status, 2015 (per cent)
<b>Table 14A.32</b>	Public hospital separations for care type "maintenance" for older people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years
<b>Table 14A.33</b>	Hospital patient days used by those eligible and waiting for residential aged care

## Attachment contents

<b>Table 14A.34</b>	Residential aged care services re-accredited in the past year, re-accreditation period in effect, as at 30 June 2018
<b>Table 14A.35</b>	Proportion of residential aged care services that are three year re-accredited, by remoteness, 2017-18
<b>Table 14A.36</b>	Proportion of residential aged care services that are three year re-accredited, by size of facility (places), 2017-18
<b>Table 14A.37</b>	All re-accredited residential aged care services, re-accreditation period in effect, as at 30 June 2018
<b>Table 14A.38</b>	Aged Care Complaints Scheme/Commissioner (number)
<b>Table 14A.39</b>	Compliance with service standards for Australian Government home care and support service providers, 2017-18
<b>Table 14A.40</b>	Compliance with service standards for WA HACC service providers
<b>Table 14A.41</b>	People aged 65 years or over who are satisfied with the quality of assistance received from organised and formal services in the last six months, by sex, by State/Territory
<b>Table 14A.42</b>	People aged 65 years or over who are satisfied with the range of organised and formal service options available, by sex, by State/Territory
<b>Table 14A.43</b>	Primary carers (carers of people aged 65 years or over) who are satisfied with the quality of formal services received to help in their caring role, by sex of carer, by State and Territory
<b>Table 14A.44</b>	Primary carers (carers of people aged 65 years or over) who are satisfied with the range of formal services available to help in their caring role, by sex of carer, by State and Territory
<b>Table 14A.45</b>	People aged 65 years or over who are satisfied with the quality of assistance received from organised and formal services in the last six months, by remoteness area, by State/Territory
<b>Table 14A.46</b>	People aged 65 years or over who are satisfied with the range of organised and formal service options available, by sex, by remoteness area, by State/Territory
<b>Table 14A.47</b>	Primary carers (carers of people aged 65 years or over) who are satisfied with the quality of formal services received to help in their caring role, by remoteness area, by State and Territory
<b>Table 14A.48</b>	Primary carers (carers of people aged 65 years or over) who are satisfied with the range of formal services available to help in their caring role, by remoteness area, by State and Territory
<b>Table 14A.49</b>	Aged care assessment program — activity and costs
<b>Table 14A.50</b>	CHSP and HACC — cost per hour of service (2017-18 dollars)
<b>Table 14A.51</b>	Participation of people aged 65 years or over in any social and community activities away from home in the last 3 months, by disability status, 2015 (per cent)
<b>Table 14A.52</b>	People aged 65 years or over who had face-to-face contact with family or friends not living in the same household in last three months, by frequency of contact and disability status, 2015 (per cent)
<b>Table 14A.53</b>	People aged 65 years or over and whether they leave home as often as they would like, by disability status, 2015 (per cent)
<b>Table 14A.54</b>	Transition Care Program, summary measures

- (a) Data in this table are the target and planning populations used for reporting in this chapter.
- (b) Data are based on Statistical Local Area (SLA) (for 2008 to 2013) or Statistical Area 2 (SA2) (from 2014) population projections prepared by the Australian Bureau of Statistics (ABS) for the Department of Health according to assumptions agreed to by the Department of Health. Data for June 2008–2012 are 2006 Census-based population projections. Data from June 2013 are 2011 Census-based population projections.
- (c) For years before 30 June 2013, remoteness areas are based on the ABS Australian Standard Geographic Classification (ASGC) (refer to Cat. no. 1216.0 for more information). From 30 June 2013, remoteness areas are based on the ABS Australian Statistical Geographic Standard (ASGS) (refer to Cat. no. 1270.0.55.001 for more information).
- (d) Aboriginal and Torres Strait Islander populations for 2008 were derived using population ratios based on the 2001 Census applied to population projections by SLA. June 2009 populations were calculated using ABS Experimental Aboriginal and Torres Strait Islander ERPs and applying the growth rates from 2001 to 2006 to subsequent years up to 2009. The growth rates contain unexplained population increase as well as population increase due to births, deaths and migration. June 2010 populations were derived using 2006 Census based ratios applied to population projections by SLA.
- (e) From June 2011 to June 2013, Aboriginal and Torres Strait Islander population projections were prepared from 2006 Census based Aboriginal and Torres Strait Islander Experimental ERP data (at SLA level) projected forward, so as to align with published ABS *Aboriginal and Torres Strait Islander Experimental Estimates and Projections* (ABS Cat. no. 3238.0, series B) at the state level.
- (f) From June 2014, Aboriginal and Torres Strait Islander projections align closely to ABS Cat. no. 3238.0 — *Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 2001 to 2026* (which are 2011 Census-based). These projections have been adjusted slightly by the Department of Health to include Other Territories.

.. Not applicable. – Nil or rounded to zero.

Source: Department of Health (unpublished) population projections prepared for the Department of Health by the ABS according to agreed assumptions; ABS (2004) *Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2009*, Cat. no. 3238.0; ABS (2008) *Experimental Estimates of Aboriginal and Torres Strait Islander Australians, June 2006*, Cat. no. 3238.0.55.001; ABS (2014) *Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 2001 to 2026*, Cat. no. 3238.0.

Non-Indigenous people aged 65 years or over	per 1000	..	..	..	155.0	..	..	..		

- (a) Includes people who received services at any time in the 12 month period to 30 June. Clients may receive care from multiple services. Clients may receive services in more than one state or territory so the Australia totals may be less than the sum of the states and territories.
- (b) A person may receive services under more than one aged care program during a year so the number of unique individuals accessing aged care cannot be determined.
- (c) The State or Territory of people receiving services is derived from the location of the service provider outlet.
- (d) Data by Indigenous status exclude clients whose Indigenous status has not been identified/stated. For service areas with a high proportion of Indigenous status 'not identified/stated', the non-Indigenous rate will be understated because it is likely that a large number of people aged 65+ years with unknown Indigenous status are non-Indigenous. See table 14A.1 for information on population data used.
- (e) For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).
- (f) The CHSP now operates fully in all states and territories, except for WA where similar levels of home support to the community are provided through some CHSP services along with the HACC program. Victoria transitioned fully to the CHSP from 1 July 2016. All other states and territories transitioned to CHSP in 2015 (after having transitioned to Commonwealth HACC in 2012).

- (a) Not all Australian, State and Territory government aged care expenditure is included in these estimates. For example, capital expenditure by the Australian, State or Territory governments is excluded (table 14A.6).
- (b) The Australian totals can include other expenditure that cannot be attributed to individual states or territories.
- (c) Totals may not add due to rounding.
- (d) Australian Government expenditure includes funding of younger people with disability using residential aged care and home care.
- (e) The category Other home care and support includes expenditure on Continence Aids Payments and the Continuity of Support Program.
- (f) CHSP expenditure includes additional expenditure on My Aged Care and Regional Assessment Service.

Table 14A.3 **Government expenditure on aged care services, 2017-18 (\$ million) (a)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i> (b)
(g)	Reports provisional HACC estimates that may be subject to revision. HACC data are for WA, where it is expenditure under the 2007 HACC Review Agreements. The expenditure in WA is total program expenditure so includes expenditure on younger and older people. The estimated proportion of total HACC program expenditure spent on older people in WA is around 80 per cent.								
(h)	Figures are subject to significant claiming lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason. Total program expenses reported does not include expenditure on wound management consumables.								
(i)	VHC expenditure data are as at 30 June 2018 based on accrual data. The Service Provision expense figures do not include fees for respite care services, as these are paid under separate appropriations. Social Assistance is also not included. Residential respite is funded under the aged care appropriation and separate figures are not available.								
(j)	Recurrent funding to residential care providers is derived using accrual based reporting (except for DVA clients which is derived using cash based reporting). Due to accrual adjustments, for smaller jurisdictions in particular, this can lead to significant year on year variation.								
(k)	The DVA expenditure figures are subject to lag and may therefore be subject to revision. All figures on the expenditure on veterans in residential aged care are sourced from data from the Department of Health (see table 14A.8 for more detail).								
(l)	State and Territory governments supplements relate to adjusted subsidy reduction payments, Enterprise Bargaining Agreements and rural small nursing homes.								
(m)	The category Other flexible and residential aged care includes expenditure on Zero Real Interest Loans, Innovative Pool, Accommodation Bond Guarantee Scheme, Bond Management and other residential care and flexible care.								
(n)	For NSW and WA, the Commonwealth subsidy payments received for the financial year and the State Government Direct Funding represent actual Medicare claim amounts received for the 2017-18 financial year. Further adjustment will occur after receipt of all final and late claims.								
(o)	For Victoria, expenditure is the cash contribution from the Victorian Government to Health Services.								
(p)	For Queensland, expenditure is a cash component based on full occupancy of the transition care places.								
(q)	For Tasmania, the State Government contribution reported includes cash and in-kind payments. These preliminary expenditure figures have been provided in September 2018 and may vary from those produced through the annual accountability reporting process for the Australian Department of Health.								
(r)	For the NT, this expenditure is in-kind contributions only.								
	.. Not applicable. – Nil or rounded to zero.								

Source: Department of Health (unpublished); DVA (unpublished); State and Territory governments (unpublished).

(a) Time series financial data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50).

(b) The Australian totals can include other expenditure that cannot be attributed to individual states or territories.

(c) See table 14A.3 for footnotes related to latest year data.

This table has been changed since an earlier version of the Report. See errata at <http://www.pc.gov.au/research/ongoing/report-on-government-services/2019/community-services/aged-care-services>.

**Table 14A.5 Real expenditure on aged care services (2017-18 \$million) (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n), (o)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas (p)</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(d)	On 1 August 2013, the Home Care Packages Program replaced the former community packaged care programs — Community Aged Care Package (CACP), Extended Aged Care At Home (EACH) packages and Extended Aged Care At Home – Dementia (EACHD) packages (July expenditure for packaged care is reported as Home Care for 2013-14). Australian Government expenditure on Home Care includes State and Territory governments' funding of younger people with disability using home care. The State and Territory governments' funding of these services is identified separately (but is not double counted in the totals).								
(e)	The CHSP officially replaced four separate home care and support programs from 1 July 2015 (except in Victoria and WA): Commonwealth HACC, Day Therapy Centres (DTC), the planned respite component of the NRCP and ACHA (Assistance with Care and Housing for Aged) programs. However, Commonwealth HACC, DTC, NRCP and ACHA programs were extended from 1 July 2015 to 31 October 2015 to allow organisations to transition to the CHSP from 1 November 2015. Expenditure on home support for 2015-16 is combined expenditure from the former Commonwealth HACC, DTC, NRCP and ACHA programs together with CHSP and also includes additional expenditure on My Aged Care and Regional Assessment Service.								
(f)	For Victoria, the transition to CHSP occurred on 1 July 2016 and this is reflected in the expenditure from 2016-17.								
(g)	Due to delays in finalising the 2013-14 and 2014-15 Schedule B of the National Partnership Agreement for Transitioning Responsibilities for Aged Care and Disability Services, State and Territory funding for young people with disability was not expended in 2013-14 or 2014-15. Expenditure in 2013-14 for Queensland and the NT relates to the 2012-13 Schedule.								
(h)	DVA community nursing expenditure data are subject to significant claiming lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason. Community nursing program expenditure does not include that spent on wound management consumables.								
(i)	The VHC service provision expenditure does not include fees for respite care services, as these are paid under separate appropriations. Social Assistance is also not included. Residential respite is funded under the aged care appropriation and separate figures are not available.								
(j)	Recurrent funding to residential care providers is derived using accrual based reporting (except for DVA clients which is derived using cash based reporting). Due to accrual adjustments, for smaller jurisdictions in particular, this can lead to significant year on year variation.								
(k)	Australian Government (Department of Health) expenditure on residential aged care and home care includes State and Territory governments' funding of younger people with disability using residential aged care and home care. The State and Territory governments' funding of these services is identified separately (but is not double counted in the totals).								
(l)	DVA expenditure on residential aged care are subject to lag and may therefore be subject to revision. For data on expenditure per client, see table 14A.8.								
(m)	State and Territory governments' supplements are for adjusted subsidy reduction, Enterprise Bargaining Agreement and rural small nursing homes.								
(n)	The increase in expenditure for the residential aged care supplement for Tasmania in 2016-17 is related to an increase in the Small Rural Nursing Home Supplement. The increase is attributable to staff costs associated with the transfer of the James Scott Wing to the non-government sector.								
(o)	The category 'Other flexible and residential aged care' includes expenditure on Innovative Pool, Zero Real Interest Loans and other residential care and flexible care.								
(p)	The decrease in the rural small nursing home supplement in 2017-18 for Tasmania is attributable to the transfer of James Scott Wing to the non-government sector in May 2017.								

**na** Not available. **..** Not applicable. **–** Nil or rounded to zero. **np** Not published.

- (a) Time series financial data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50).
- (b) These expenditure data are not included in calculations of government expenditure reported in tables 14A.3–5.
- (c) While Queensland maintains a regular maintenance and capital renewal program for all its facilities it is not always able to separate capital expenditure that is for aged care services only, from expenditure in the general health capital program
- (d) While Tasmania maintains a regular maintenance and capital renewal program for all its facilities it is not always able to quantify its capital expenditure on aged care services only.
- (e) Rural and Regional Building Fund/Rural and Remote Building Fund expenditure is to assist aged care residential services in rural or remote locations that are unable to meet the cost of necessary capital works from the income they receive through resident accommodation payments (accommodation bonds and accommodation charges, and the capital component of Australian Government recurrent funding).

Table 14A.6      **Real capital expenditure on aged care services (2017-18 \$million)**

<b>Total program expense (l)</b>	<b>\$'000</b>	<b>63 400</b>	<b>15 200</b>	<b>25 400</b>	<b>10 900</b>	<b>7 100</b>	<b>5 300</b>	<b>2 500</b>	<b>100</b>	<b>129 900</b>
Average expense per client (m)	\$	619	554	543	702	616	651	640	525	602

- (a) 'Veterans approved for VHC Services' and the 'Average number of hours approved per year for non-transitional veterans' relate to services that were approved to occur but not necessarily provided in the reference year.
- (b) Individual service totals will not add to the all services total because veterans may be approved for more than one service. In addition, state/territory totals may slightly exceed total Australia figure as some veterans move state during the year and are counted in each state of residence.
- (c) Transitional veterans are those veterans who transferred to the VHC program from the HACC program, often with grandfathered service and/or fee levels, and so may have been approved for higher hours of service than other VHC clients. Veterans who did not transfer from the HACC program are referred to as 'non-transitional'.
- (d) These figures are approximations only; the data has been derived from percentage age distributions sourced from a separate data set.
- (e) VHC expense figures are as at 30 June 2018 based on accrual data.
- (f) The Service Provision expense figures do not include fees for respite care services, as these are paid under separate appropriations. Social Assistance is also not included. Residential respite is funded under the aged care appropriation and separate figures are not available.
- (g) Average expense per client figures are for core VHC services only; that is, they exclude Respite Services (in-home, emergency and residential) as these are paid under separate appropriations. They also exclude Social Assistance.
- (h) Due to the very small number of clients, some ACT client numbers have been included with NSW and some NT client numbers have been included with SA.
- (i) Individual state/territory totals may not add up to the total for Australia because veterans can move between states. Individual service totals may not add up to the total for all services because veterans can move between service types.
- (j) DVA Community Nursing services are provided under a casemix model using a 28-day claiming cycle, with clients classified into categories based on care interventions. As a substantial proportion of clients receive services for well under 12 months, the average hours per 28-day claim period more accurately reflects the average service levels received by clients.

TABLE 14A.7

Table 14A.7 **Australian Government (DVA) Veterans' Home Care (VHC) and Community Nursing programs, 2017-18**

--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(k) Estimated as some data on hours provided are not available.

(l) Total Program Expense data are subject to significant claiming lag and may therefore be subject to revision. These figures may differ slightly from the figures published in the DVA annual report for this reason. Total program expenses reported does not include expenditure on wound management consumables.

(m) Average expenses do not include wound management consumables.

**np** Not published. – Nil or rounded to zero.

- (a) Time series financial data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50).
- (b) The figures are subject to lag and may therefore be subject to revision. All figures on the number of, and expenditure on, veterans in residential aged care are sourced by DVA from the Department of Health. For DVA expenditure by state or territory, Department of Health calculations are based on data at state or territory level supplied by DVA, adjusted to sum to the total accrual amount for Australia. Recurrent funding to residential care providers is derived using cash based reporting.
- (c) The NT client numbers for 2009 were included with SA due to the very small number of clients.
- (d) The Australian client number includes overseas clients.
- (e) The state/territory figures for 2011 are estimates.
- (f) The category 'Veterans 65 years or over' includes those whose age is unknown. The Australian total for eligible veterans is the treatment population (both veterans and dependants) and does not include those clients residing overseas

(a) Data on the number and proportion of places by level for 2014 exclude flexible community places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool program and Multi-Purpose Service Program. For June 2015 and June 2016, these flexible places are included in home care level 2. For June 2017, these programs are excluded as data on the number of recipients for these programs are not available.

(b) For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).

(c) From 27 February 2017, all home care packages have been provided to individual consumers. Previously home care packages were awarded to approved providers. As a result, places are no longer allocated by state/territory.

– Nil or rounded to zero.

- (a) Data for 2015 exclude flexible community places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool program and Multi-Purpose Service Program. For June 2015 and June 2016, these flexible places are included in home care level 2. For June 2017, these programs are excluded as data on the number of recipients for these programs are not available.
- (b) For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).
- (c) Information up to and including June 2016 are for Home Care Program operational places. For June 2017, information on recipients are presented. From 27 February 2017, all home care packages have been provided to individual consumers. Previously home care packages were awarded to approved providers. As a result, places are no longer allocated by state/territory.
- (d) Services to an identifiable community based on location or ethnicity, not for financial gain.
- (e) Services to the general community or an appreciable section of the public, not for financial gain.
- .. Not applicable. – Nil or rounded to zero.

- (a) Data exclude flexible residential places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool program and Multi-Purpose Service Program. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).
- (b) Includes basic subsidy plus Conditional Adjustment Payment (CAP). Subsidy reported in constant dollars (that is, \$ 2017-18).
- (c) Subsidy plus CAP divided by the number of recipient days, multiplied by 365. Differences in average annual subsidies reflect differences in the dependency of residents.
- (d) The ACFI proportions are for permanent residents that have an ACFI classification.
- (e) Numbers of all residents at 30 June (whether they have an ACFI or not).
- (f) Numbers of permanent residents are 'all permanent residents' at 30 June (whether they have an ACFI or not).

(a) The occupancy rate is defined as the proportion of available bed days that were used for residential care. Occupancy is measured over the financial year however places are reported at 30 June.

(b) Data exclude flexible residential places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool program and Multi-Purpose Service Program. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).

(c) See footnotes to table 14A.1 for detail on regional data classifications.

(d) From June 2015, the data on the number of operational places are not comparable to the equivalent data in table 14A.10, which include flexible places.

.. Not applicable. – Nil or rounded to zero.

Source: Department of Health (unpublished).

- (a) Places do not include those that have been approved, but are not yet operational. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).
- (b) Government planning targets are based on people aged 70 years or over. However, in recognition of poorer health among Aboriginal and Torres Strait Islander communities, planning in some cases also takes account of the Aboriginal and Torres Strait Islander population aged 50–69 years. This means that the provision ratio based on the population aged 70 years and over may appear high in areas with a high Aboriginal and Torres Strait Islander population (such as the NT).
- (c) Population data are calculated on a different basis across years. See table 14A.1 for notes and sources of population data.
- (d) Data include flexible care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, MPS Program and Innovative Pool Program.
- (e) Totals may not add due to rounding.
- (f) Transition care ratios for 2017 include places for transition care and short term restorative care (STRC).

(a) Places do not include those that have been approved, but are not yet operational. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).

(b) Data for the numerators are all operational places (by service type). Data for the denominators are people aged 70 years or over and Aboriginal and Torres Strait Islander Australians aged 50–69 years.

(c) Population data are calculated on a different basis across years. See table 14A.1 for notes and sources of population data.

(d) Data include flexible care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, MPS Program and Innovative Pool Program.

(e) Totals may not add due to rounding.

(f) Transition Care ratios for 2017 include places for transition care and short term restorative care (STRC).

Source: Department of Health (unpublished) Australian Government Department of Health Aged Care data warehouse.

**Table 14A.16 Residential and community aged care places/recipients per 1000 population, by remoteness, 30 June 2018 (a), (b)**

	<i>Residential aged care places per 1000 population (c)</i>	<i>Community aged care recipients per 1000 population (d)</i>
Major Cities	79.4	35.3
Inner Regional and Outer Regional	66.7	33.1
Remote and Very Remote	43.0	24.2

(a) Population people aged 70 years and over plus Aboriginal and Torres Strait Islander people aged 50–69 years at 30 June 2018.

(b) These data should not be compared with data for 30 June 2017 in the previous 2018 Report, as data for the two years were derived using different methods.

(c) Count is of operational residential places delivered in Australian Government subsidised residential aged care facilities at 30 June 2018 and includes places in the MPS program and places delivered under the National Aboriginal and Torres Strait Islander Flexible Aged Care and Innovative Care Pool programs delivered in a residential aged care facility. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents](http://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents)).

(d) Count is of operational home care recipients at 30 June 2018 and includes: Home Care Packages 1 - 4, Transition Care Program, and Multi-Purpose Services and places delivered under the National Aboriginal and Torres Strait Islander Flexible Aged Care and Innovative Care Programs provided in the community.

*Source:* Department of Health (unpublished) Australian Government Department of Health Aged Care data warehouse.

(a) See table 14A.1 for notes and sources of population data.

(b) Results for this table may have been derived using small numbers, in particular where the rates are for a small program or smaller jurisdictions. For more information on data quality, including collection methodologies and data limitations, see the AIHW website (<https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents>).

– Nil or rounded to zero.

- (a) Concessional residents are those who entered care prior to 20 March 2008, and who at the date they entered care, received an income support payment and had not owned a home for the last two years (or whose home was occupied by a 'protected' person, for example, the care recipient's partner) and had assets of less than 2.5 times the annual single basic age pension (or for a transfer from 20 September 2009 less than 2.25).
- (b) Assisted residents are those meeting the above criteria, but with assets between 2.5 and 4.0 times the annual single basic age pension (or for a transfer from 20 September 2009 between 2.25 and 3.61).
- (c) Supported residents are those who entered permanent residential care on or after 20 March 2008 (or who re-enter care on or after 20 March 2008 after a break in care of more than 28 days) and have assets below a set amount.
- (d) Low means residents are those who have entered permanent residential care on or after 1 July 2014 (or who re-enter care on or after 1 July 2014 after a break in care of more than 28 days; or who re-enter care on or after 1 July 2014 and choose to 'opt in' to the new means testing arrangements) and have a daily means tested amount (assessed under the combined assets and income means test) at the date they enter care that is less than the maximum daily rate of accommodation supplement.
- (e) These data refer to permanent residents only, at their first admission. For more information on data quality, including collection methodologies and data limitations, see the AIHW website (<https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents>).
- (f) Low means residents data were not available for 2014-15. Therefore, the 2014-15 data for new residents are not available and the data for all permanent residents care days are not comparable with other years.

na Not available.

(a) Reports provisional data that have not been validated and may be subject to revision. For more information on data quality, including collection methodologies and data limitations, see the AIHW website (<https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents>).

**Table 14A.22 HACC services received per 1000 people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years (a), (b), (c), (d), (e), (f), (g)**

	<i>NSW</i>	<i>Vic (h)</i>	<i>Qld</i>	<i>WA</i>	<i>SA (i)</i>	<i>Tas (j)</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	From 1 July 2012, the Australian Government assumed full funding and operational responsibility for Commonwealth HACC services delivered to people aged 65 years or over (or 50 years or over for Aboriginal and Torres Strait Islander peoples), except in WA and Victoria, where state-based arrangements continue for WA, but for the Victoria the transition occurred on 1 July 2016. From 1 July 2015, the Commonwealth Home Support Programme (CHSP) consolidated aged care services provided under the Commonwealth HACC Program, National Respite for Carers Program, Day Therapy Centres Program, and the Assistance with Care and Housing for the Aged Program. For these reasons, HACC data are reported for WA and Victoria only in 2015-16 and for WA only from 2016-17.								
(c)	Data in this table represent HACC services received by people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years, divided by people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years.								
(d)	The proportion of HACC funded agencies that submitted HACC Minimum Data Set data differed across jurisdictions and years. Actual service levels may be higher than those reported here.								
(e)	See table 14A.1 for notes and sources of population data.								
(f)	The proportion of HACC clients with unknown or null Aboriginal and Torres Strait Islander status differed across jurisdictions and years. Client records for people aged 50–64 years that do not contain information on Aboriginal and Torres Strait Islander status are excluded.								
(g)	The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. Client records that do not contain information on date of birth are excluded.								
(h)	Validation processes for the Victorian Data Repository (VDR) and the HACC Minimum Data Set differ and actual service levels may be up to 9 per cent higher or lower than stated. For example, for 2013-14, in the case of respite care, the VDR recorded service levels 27 per cent higher than shown in the table, for Centre Based Day Care, the VDR recorded service levels 13 per cent higher than shown in the table and for counselling, the VDR recorded service levels 26 per cent higher than shown in the table. No targets are set and relatively little is reported.								
(i)	Validation processes for SA may have differed from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.								
(j)	For 2011-12, for Tasmania, partial data has been received from Multi-Purpose Services. HACC funded services delivered by Multi-Purpose Services in 2011-12 are therefore under-reported.								
(k)	Allied Health Care includes at home and at centre.								
(l)	Nursing Care includes at home and at centre.								
(m)	Goods and Equipment levels for WA in 2014-15 may be under-reported due to a data submission error. – Nil or rounded to zero. .. Not applicable.

(a) Data in this table include complete assessments only for all years and exclude assessments which were withdrawn or cancelled.

Table 14A.24 **Aged care assessments (a), (b), (c), (d), (e), (f)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	The number of Aboriginal and Torres Strait Islander assessments is based on self-identification of Aboriginal and Torres Strait Islander status. Therefore these figures may not accurately represent the number of assessment for Aboriginal and Torres Strait Islander persons.								
(c)	Results for this table may have been derived using small numbers, in particular where the rates are for a smaller jurisdiction. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ( <a href="https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents">https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents</a> ).								
(d)	Data for 2011-12 and 2012-13 were extracted from the Ageing and Aged Care Data Warehouse from preliminary data using the snapshot effective dates of 31 August 2013 and 31 August 2014 respectively. Future extracts of this data may be updated and thus alter final numbers.								
(e)	See footnotes to table 14A.1 for information on population projections.								
(f)	Data for 2015-16 was extracted from the Ageing and Aged Care Data Warehouse in October 2017. ACATs transitioned to use My Aged Care systems in early 2016. My Aged Care assessment data contained an additional 37 473 assessments nationwide that could not be attributed to a state or territory.

**Table 14A.25 Age-specific rates for ACAT approvals of eligibility, by age (no. per 1000 people) (a), (b), (c), (d), (e)**

	<i>NSW (d)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	The population data used to calculate these rates are for 31 December and are available in table 2A.2 of the Chapter 2, Statistical Context attachment.								
(b)	Data for 2011-12 and 2012-13 were extracted from the Ageing and Aged Care Data Warehouse from preliminary data using the snapshot effective dates of 31 August 2013 and 31 August 2014 respectively. Further extracts of this data may differ.								
(c)	For more information on data quality, including collection methodologies and data limitations, see the AIHW website ( <a href="https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents">https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents</a> ).								
(d)	The ACAP 2009-10 data for NSW in the Ageing and Aged Care Data Warehouse includes an unknown number of duplicate records created by a range of database changes and/or Aged Care Assessment Team amalgamations undertaken by the respective state governments. This has a flow-on effect on the national figures.								
(e)	For 2015-16, there were 694 Home Care and 979 residential aged care assessment approvals excluded as state/territory was not identified.

- (a) Data only include records where ACAT approval is before admission date. Data only include first admissions in the financial year. Data are based on location of the service. Data with unknown elapsed time are excluded.
- (b) The measure of 'elapsed time' is utilised because the period of time between the ACAT approval and entry into residential care and receipt of Home Care may be due to factors which cannot be categorised as 'waiting time'.
- (c) Prior to 27 February 2017, consumers were approved at broad-banded package levels (1-2 or 3-4), without priority. Consumers are now approved at individual package levels (1, 2, 3 or 4) and have their priority considered in a nationally consistent way. People are also assigned packages directly, which allows them more opportunity to engage a provider of their choice. Given the considerable differences to the way people are now approved and prioritised, only approvals made from 27 February 2017 onwards are included, to reflect the operation of the new system and related consumer outcomes.
- Nil or rounded to zero. **np** Not published.

(a) Data only includes records where ACAT approval is before admission date. Data only includes first admissions in the financial year.

(b) A small number of recipient postcodes are invalid and not able to be reported by remoteness area. Postcodes that span more than one remoteness area are apportioned as per ABS 1270.0.55.006 - Australian Statistical Geography Standard (ASGS): Correspondences, July 2011.

(c) Data with unknown elapsed time are excluded.

(d) Remoteness area is the area of the recipient of care at the time of their approval to receive aged care services. State and territory is the state or territory in which the service was provided. Some recipients are counted in remoteness categories that do not exist in the state or territory they are counted in, as they are receiving care in a state or territory other than that in which they received their approval for care.

(e) Data for residential care only includes permanent residents.

(a) Data only includes records where ACAT approval is before admission date. Data only includes first admissions in the financial year.

(b) Elapsed time by SEIFA are determined from the recipient's residential postcode at time of assessment using 2033.0.55.001 – *Census of Population and Housing: Socio-Economic Indexes for Areas (SEIFA), Australia, 2011*. Recipient's postcodes not found in the ABS's SEIFA data are excluded.

(c) Data with unknown elapsed time are excluded.

(d) Data are based on the postcode of the recipient's residence.

(e) Data for residential care only includes permanent residents.

– Nil or rounded to zero.

(a) Data include completed assessments and assessments which were withdrawn or cancelled, and exclude assessments that were ongoing at the end of the year.

(b) The most recent assessment for an individual client is counted (if the client had more than one assessment in the financial year).

**Table 14A.30 Recommended location of longer term living arrangements of Aged Care Assessment Program clients (a), (b), (c)**

	<i>Unit</i>	<i>NSW (d)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Results for this table may have been derived using small numbers, in particular where the rates are for a small program, smaller jurisdictions or remote/very remote areas. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ( <a href="https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents">https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents</a> ).									
(d)	The 2009-10 data for NSW in the Ageing and Aged Care Data Warehouse includes an unknown number of duplicate records created by a range of database changes and/or ACAT amalgamations undertaken by the respective State governments. This has a flow-on effect on the national figures.									
(e)	Includes independent living in retirement villages, supported community accommodation and boarding houses.									
(f)	Includes hospital, other institutional care and other.									
(g)	No long term plan made includes the following categories: died, cancelled, transferred, other incomplete assessments and unknown.									
(h)	Data for 2011-12 and 2012-13 were extracted from the Ageing and Aged Care Data Warehouse from preliminary data using the snapshot effective dates of 31 August 2013 and 31 August 2014 respectively. Future extracts of this data may be updated and thus alter final numbers.									
(i)	For 2015-16, there were 29 256 assessments where the clients' recommended longer-term care arrangements were unknown. There were 37 484 assessments conducted where the State or Territory of assessment was not reported. These have been included in the total number of people receiving assessments, but excluded from the percentages of longer-term arrangements and 'no long term plan made'.									

– Nil or rounded to zero.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Cells in this table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. For more information on data quality, including collection methodologies and data limitations, see the ABS website (<http://www.abs.gov.au/ausstats/abs@.nsf/PrimaryMainFeatures/4430.0?OpenDocument>).
- (b) Aged 65 years or over, living in households.
- (c) Measures need for assistance with the following activities: cognitive or emotional tasks, communication, health care, household chores, meal preparation, mobility, property maintenance, reading or writing, self-care and transport.
- (d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent). A <sup>††</sup> indicates a relative standard error (RSE) of between 25 per cent and 50 per cent. Estimates with RSEs greater than 25 per cent should be used with caution.
- (e) Data for NT should be interpreted with caution as the *Survey of Disability, Ageing and Carers 2015* excluded discrete Aboriginal and Torres Strait Islander communities and very remote areas, which comprise around 28 per cent of the estimated resident population of the NT living in private dwellings.

**Table 14A.32 Public hospital separations for care type "maintenance" for older people aged 65 years or over and Aboriginal and Torres Strait Islander Australians aged 50–64 years (a), (b), (c), (d), (e), (f), (g)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Data are comparable (subject to caveats) across jurisdictions and over time.									
Data are complete (subject to caveats) for the current reporting period.									
(a) Data include completed hospital separations with a care type of maintenance care for people aged 65 years or over and Aboriginal and Torres Strait Islander persons aged 50–64 years, with a principal or additional diagnosis of Z75.11 or Z74.2. The code Z75.11 is defined as “person awaiting admission to residential aged care”. The code Z74.2 is defined as “need for assistance at home and no other household member able to render care”.									
(b) These data only account for completed unlinked separations — that is, if a change in the type of care occurs during a patient’s hospital stay, these data do not combine these separations to reflect the full length of hospital stay for a patient.									
(c) Diagnosis codes may not be applied consistently across jurisdictions, or over time. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ( <a href="http://www.aihw.gov.au">www.aihw.gov.au</a> ).									
(d) Although the diagnosis codes reflect a care type, they do not determine a person's appropriate requirement for residential aged care (this is determined by an ACAT assessment).									
(e) The code ‘need for assistance at home and no other household member able to render care’ may also be used for respite care for aged care residents or those receiving community care and some jurisdictions may have a high proportion of this type of use. This is particularly relevant in some rural areas where there are few alternative options for these clients.									
(f) Data from 2011-12 include public patients in private hospitals, these patients were not included in 2009-10 or 2010-11.									
(g) Excludes separations with a care type of Newborn without qualified days, and records for Hospital boarders and Posthumous organ procurement.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Cells have been suppressed to protect confidentiality where the presentation could identify a patient or service provider or where rates are likely to be highly volatile, for example, where the denominator is very small. For more information on data quality, including collection methodologies and data limitations, see the AIHW website ([www.aihw.gov.au](http://www.aihw.gov.au)).
- (b) Victoria has developed alternative care pathways for older people waiting for residential aged care to be supported outside the acute hospital system. These alternative care pathways impact on the data reporting the number of hospital patient days by those eligible and waiting for residential aged care.

Table 14A.33 **Hospital patient days used by those eligible and waiting for residential aged care (a)**

	<i>NSW</i>	<i>Vic (b)</i>	<i>Qld</i>	<i>WA</i>	<i>SA (c)</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Due to specific state-based attributes relating to the administration of residential aged care in SA, data relating to the rate per 1000 patient days should be interpreted with care.								
(d)	For 2010-11 and subsequent years, Indigenous status data for Tasmania and the ACT are of sufficient quality for statistical reporting purposes. For 2009-10 and previous years, data for Tasmania and the ACT should be interpreted with caution.								
(e)	'Other Australians' includes non-Indigenous Australians and those for whom Indigenous status was not stated.								
(f)	Disaggregation by remoteness is by the patient's usual residence, not the location of the hospital. Patient days are reported by jurisdiction of hospitalisation, regardless of the jurisdiction of residence. Hence, rates represent the number of patient days for patients living in each remoteness area (regardless of their jurisdiction of usual residence) divided by the total number of patient days for patients living in that remoteness area and hospitalised in the reporting jurisdiction.								
(g)	Socio-Economic Indexes for Areas (SEIFA) quintiles are based on the ABS Index of Relative Socio-Economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. Each SEIFA quintile represents approximately 20 per cent of the national population, but does not necessarily represent 20 per cent of the population in each state or territory. Disaggregation by SEIFA is by the patient's usual residence, not the location of the hospital. Patient days are reported by jurisdiction of hospitalisation, regardless of the jurisdiction of residence. Hence, rates represent the number of patient days for patients living in each SEIFA quintile (regardless of their jurisdiction of usual residence) divided by the total number of patient days for patients living in that SEIFA quintile and hospitalised in the reporting jurisdiction.								
(h)	Total includes separations for which place of residence was not known, not stated or could not be mapped to a SEIFA index.								
(i)	Data for Tasmania for 2008-09 does not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations. – Nil or rounded to zero. <b>np</b> Not published.

Table 14A.38 **Aged Care Complaints Scheme/Commissioner (number) (a), (b), (c), (d)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a) From 1 July 2015, the Commonwealth Home Support Programme (CHSP) consolidated aged care services provided under the Commonwealth HACC Program, National Respite for Carers Program, Day Therapy Centres Program, and the Assistance with Care and Housing for the Aged Program. The former Scheme continued to respond to HACC sub-program aged care complaints from 1 July 2015 and began responding to aged care complaints related to all sub-program under the CHSP from 1 November 2015.									
(b) On 1 January 2016, the Aged Care Complaints Commissioner replaced the Aged Care Complaints Scheme.									
(c) 2015-16 and 2016-17 numbers are based on revised published and unpublished data as at 30 June 2018.									
(d) Flexible / Community Care includes National Aboriginal and Torres Strait Islander Flexible Aged Care Program (NATSIFACP), Short-Term Restorative Care Programme (STRCP), Multi-Purpose Services (MPS) and Transition Care.									
– Nil or rounded to zero.

Table 14A.39 **Compliance with service standards for Australian Government home care and support service providers, 2017-18 (a)**

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
<i>Progress with reviews to be conducted during 3-year cycle (2017 – 2020)</i>										
Reviews conducted to 30 June 2018 of those to be conducted (b)	no.	110	191	127	11	58	26	13	24	560
Reviews to be conducted during cycle	no.	765	452	558	114	202	83	28	87	2 289
Reviews conducted to 30 June 2018 of those to be conducted	%	14.4	42.3	22.8	9.6	28.7	31.3	46.4	27.6	24.5
<i>Proportion of reviews that met all expected outcomes under each of the Standards</i>										
Standard 1 — Effective management (c)	%	95.5	96.3	92.2	91.7	79.3	92.0	84.6	81.8	92.3
Standard 2 — Appropriate access and service delivery (d)	%	95.5	96.9	97.7	100.0	82.8	92.0	92.3	81.8	94.5
Standard 3 — Service user rights and responsibilities (e)	%	99.1	99.0	96.9	100.0	93.1	100.0	100.0	81.8	97.3

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) The Australian Government programs included varies across jurisdictions. The programs included for NSW, Victoria, Queensland, SA, Tasmania, the ACT and the NT are Commonwealth Home Support Program and Home Care. For WA, it is Home Care and the National Respite for Carers Program.
- (b) 2017-18 is year 1 of a new 3 year cycle for Home Care. Data includes 13 Quality Reviews for Standalone Aboriginal and Torres Strait Islander services.
- (c) Standard 1 — Effective management — the service provider demonstrates effective management processes based on a continuous improvement approach to service management, planning and delivery.
- (d) Standard 2 — Appropriate access and service delivery — each service user (and prospective service user) has access to services and service users receive appropriate services that are planned, delivered and evaluated in partnership with themselves and/or their representatives.
- (e) Standard 3 — Service user rights and responsibilities — each service user (and/or their representative) is provided with information to assist them to make service choices and has the right (and responsibility) to be consulted and respected. Service users (and/or their representative) have access to complaints and advocacy information and processes and their privacy and confidentiality and right to independence is respected.

**Table 14A.43 Primary carers (carers of people aged 65 years or over) who are satisfied with the quality of formal services received to help in their caring role, by sex of carer, by State and Territory (a), (b), (c), (d), (e)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a) Includes primary carers (aged 15 years or over) with a main recipient of care aged 65 years or more, or a non-main recipient aged 65 years or more. Recipients of primary carers are people living with a profound or severe core activity limitation. See section 15.4 for more details.									
(b) Organised services to help in caring role may include services which are not directly related to a carer's recipient but which the primary carer perceives as helping them in their caring role.									
(c) Data includes only those persons who undertook a personal interview, and does not include proxy interviews.									
(d) Primary carers who did not state their receipt and satisfaction with the quality of organised services have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. It should be noted that in 2015 this represents 32% of all Primary Carers of persons aged 65 years or over who used services. In 2012, 48% of Primary Carers of persons aged 65 years or over did not state their receipt and satisfaction with the quality of organised services.									
(e) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS Cat. no. 4430.0) for more details.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

**Table 14A.44 Primary carers (carers of people aged 65 years or over) who are satisfied with the range of formal services available to help in their caring role, by sex of carer, by State and Territory (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Includes primary carers (aged 15 years or over) with a main recipient of care aged 65 years or more, or a non-main recipient aged 65 years or more. Recipients of primary carers are people living with a profound or severe core activity limitation. See section 15.4 for more details.									
(b)	Organised services to help in caring role may include services which are not directly related to a carer's recipient but which the primary carer perceives as helping them in their caring role.									
(c)	Data includes only those persons who undertook a personal interview, and does not include proxy interviews.									
(d)	Primary carers who did not state their satisfaction with the range of organised services have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. It should be noted that in 2015 this represents 17% of Primary Carers of persons aged 65 years or over. In 2012, 28% of Primary Carers of persons aged 65 years or over did not state their satisfaction with the range of organised services available.									
(e)	Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS Cat. no. 4430.0) for more details.									

– Nil or rounded to zero. **np** Not published.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

**Table 14A.47 Primary carers (carers of people aged 65 years or over) who are satisfied with the quality of formal services received to help in their caring role, by remoteness area, by State and Territory (a), (b), (c), (d), (e), (f)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Includes primary carers (aged 15 years or over living in households) with a main recipient of care aged 65 years or more, or a non-main recipient aged 65 years or more. Recipients of primary carers are people living with a profound or severe core activity limitation. See definitions for Main recipient of care and Primary Carer in the Survey of Disability, Ageing and Carers, Australia: Summary of Findings, 2015 (Cat. no. 4430.0) Glossary.								
(b)	Organised services to help in caring role may include services which are not directly related to a carer's recipient but which the primary carer perceives as helping them in their caring role.								
(c)	Data includes only those persons who undertook a personal interview, and does not include proxy interviews.								
(d)	Only includes primary carers who reported receiving assistance from organised services to assist with their caring role in the last 6 months.								
(e)	Primary carers who did not state their receipt and satisfaction with the quality of organised services have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. It should be noted that in 2015 this represents 32% of all Primary Carers of persons aged 65 years or over who used organised services in the previous 6 months and 48% of the same population in 2012. Refer to SDAC Summary of Findings Publication (ABS Cat. no. 4430.0) for further information about the 'not stated' responses for these data items.								
(f)	Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS Cat. no. 4430.0) for more details.								
(g)	Includes inner regional, outer regional and remote. Excludes very remote and migratory areas. Refer to the SDAC Summary of Findings publication (ABS Cat. no. 4430.0) for further details.								
	– Nil or rounded to zero. <b>np</b> Not published. .. Not applicable.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Data for assessments for 2011-12 and 2012-13 were extracted from the Ageing and Aged Care Data Warehouse from preliminary data using the snapshot effective dates of 31 August 2013 and 31 August 2014 respectively. Data in this table include complete assessments only for all years and exclude assessments which were withdrawn or cancelled.
- (b) The high cost for ACAT assessment in the NT is influenced by assessments of clients in remote locations necessitating additional costs including travel and accommodation for ACAT assessors.
- (c) Aged care assessment expenditure is Australian Government spending only.
- (d) Time series financial data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50).
- (e) Cost per assessment includes clients aged less than 65 years.
- (f) Data for 2015-16 was extracted from the Ageing and Aged Care Data Warehouse in October 2017. ACATs transitioned to use My Aged Care systems in early 2016. My Aged Care assessment data contained an additional 37 473 assessments nationwide that could not be attributed to a state or territory.
- (g) Data in this table include complete assessments only for all years and exclude assessments which were withdrawn or cancelled.

Data are not comparable across jurisdictions (see caveats in footnotes below).

Data are complete (subject to caveats) for the current reporting period.

- (a) Time series financial data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50).
- (b) There is no commonly agreed methodology for calculating unit costs and therefore unit costs across jurisdictions are not comparable.
- (c) The unit costs reported for some years do not correspond to Victoria's HACC unit prices published by the Department of Health, since they are based on a different methodology.
- (d) WA contract by service group. Unit costs reported are an average across all services in the group. The NT contracted by service group in 2009-10.
- (e) Unit costings are not available for the NT for some years or for some services in some years due to remote services and other factors.
- (f) The Department of Health advised that the CHSP was estimated to have supported more than 640 000 older clients aged 65 years and over (50 years and over for Aboriginal and Torres Strait Islander people) in 2015-16 through direct delivery of home support services. Due to under-reporting and a new data capturing system CHSP client and activity data were not provided for 2015-16.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Cells in this table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. For more information on data quality, including collection methodologies and data limitations, see the ABS website (<http://www.abs.gov.au/ausstats/abs@.nsf/PrimaryMainFeatures/4430.0?OpenDocument>).
- (b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent). A '\*' indicates a relative standard error (RSE) of between 25 per cent and 50 per cent. Estimates with RSEs greater than 25 per cent should be used with caution.
- (c) Data are for older people living in households only.
- (d) The social and community activities participated in away from home in the last 3 months are: visited relatives or friends, went out with friends or relatives, religious or spiritual group activities, voluntary or community service activities, performing arts group activity, art or craft, or practical hobby group activities, went on holidays or camping with others, sport or physical recreation with others, other recreational or special interest group activities, support groups and other activities not specified elsewhere.

**Table 14A.51 Participation of people aged 65 years or over in any social and community activities away from home in the last 3 months, by disability status, 2015 (per cent) (a), (b), (c), (d)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT (e)</i>	<i>Aust</i>
--	------------	------------	------------	-----------	-----------	------------	------------	---------------	-------------

(e) Data for NT should be interpreted with caution as the ABS Survey of Disability, Ageing and Carers 2015 excluded discrete Aboriginal and Torres Strait Islander communities and very remote areas, which comprise around 28 per cent of the estimated resident population of the NT living in private dwellings.

<b>All reasons</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Cells in this table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. For more information on data quality, including collection methodologies and data limitations, see the ABS website (<http://www.abs.gov.au/ausstats/abs@.nsf/PrimaryMainFeatures/4430.0?OpenDocument>).
- (b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent). A '\*' indicates a RSE of between 25 per cent and 50 per cent. Estimates with RSEs greater than 25 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use.

**Table 14A.53 People aged 65 years or over and whether they leave home as often as they would like, by disability status, 2015 (per cent) (a), (b), (c)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT (d)</i>	<i>Aust</i>
--	------------	------------	------------	-----------	-----------	------------	------------	---------------	-------------

(c) Data are for older people living in households only.

(d) Data for NT should be interpreted with caution as the ABS Survey of Disability, Ageing and Carers 2015 excluded discrete Aboriginal and Torres Strait Islander communities and very remote areas, which comprise around 28 per cent of the estimated resident population of the NT living in private dwellings.

**np** Not published.

Data are comparable (subject to caveats) across jurisdictions and over time.

Data are complete (subject to caveats) for the current reporting period.

- (a) Average length of stay and the Modified Barthel Index data only include recipients who completed a transition care episode, while admissions and discharges are totals for the financial year (that is, not restricted to those who completed transition care episode).
- (b) At 30 June.
- (c) Allocated places include places that will not be funded and therefore cannot become operational until the next financial year. For more information on data quality, including collection methodologies and data limitations, see the AIHW website (<https://www.aihw.gov.au/reports/aged-care/national-aged-care-data-clearinghouse-data-dictionary-version-1-0/contents/table-of-contents>).
- (d) Data are adjusted to 2017-18 dollars using the GGFCE chain price deflator (2017-18 = 100) (table 2A.50). Includes direct funding only.
- (e) Includes direct funding and in-kind contributions. See table 14A.3 for footnotes related to State and Territory expenditure on the Transition Care Program.
- (f) The Modified Barthel Index is a measure of functioning in the activities of daily living reported for Transition Care Program recipients who completed a transition care episode with zero being fully dependent and 100 being fully independent.
- (g) Different health and aged care service systems, local operating procedures and client groups can have an effect on the outcomes of the Transition Care Program across jurisdictions.
- (h) Average Functional Capacity Scores on Entry and on Exit are for Transition Care completed episodes only.
